ALBERTA GOVERNMENT SYSTEMS INVENTORY

1991

PUB PWSS 96

PUBLIC WORKS, SUPPLY AND SERVICES

91-05973/

Preface

The purpose of the Alberta Government Systems Inventory is to provide current information on EDP systems operating within the Alberta Government. An overview of each system is presented according to subject matter.

The Planning and Policy Branch of Public Works, Supply and Services, Information Services is responsible for maintaining the master copy of this Inventory. For information regarding the contents or use of this document contact:

Doug Sigler
Director
Planning and Policy Branch
Information Services
Public Works, Supply and Services

Public Works, Supply and Services Common Systems	137
Index by Department	139

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Accounting	A/P and Inventory	AADAC	Provides an inventory listing. Provides monthly analysis of expenditures by cost center and organizational structure as well as projected deficit/surplus budget forecast. (Computer Sciences Canada) **CONTACT:** Vince Pallier, Senior Accountant
	Accounts Payable (AP)	Culture	To assist in maintaining the accounts payable ledger for SAJA, NAJA and PM&A. (ACCPAC) **CONTACT:** Aziz Alidina, Revolving Fund 427-2715
	Accounts Receivable (AR)	Culture	To assist in maintaining the accounts receivable ledgers for SAJA, NAJA and PM&A. (ACCPAC) **CONTACT:** Aziz Alidina, Revolving Fund 427-2715
	Accounts Receivable/Invoicing	Labour	A microcomputer system that provides the Accounts Receivable and Invoicing functions for the Boiler system and the other branches in the department. Functions provided include account maintenance, invoice entry, cash posting, trial balance, customer statement, month end posting, general ledger summary, interest calculation and invoice generation. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Accounts Receivable System	Culture	To assist Financial Services Accounts Receivable to monitor the procedures of account receivable and keep track of the outstanding accounts. (FOXBASE) **CONTACT:** Ann Krogh, Financial Services 427-6529
	Accounts Receivable System (MARS)	PWSS	The system provides for the management of customer accounts and produces various types of reports to control the day to day operations within Revenue Accounting, Revolving Fund Accounting Branch. PC **CONTACT:** Management Services Branch, Systems Section 427-2222
	Accounts Receivable System (ARS)	Recreation and Parks	The system provides management with detailed information for controlling receivables. The system achieves this objective by validating in-coming postings: Invoices, Payments and Adjustments; maintains a file of outstanding invoices and produces reports for supporting the integrity of the system and finally delivers a monthly aging report. **CONTACT:** Co-ordinator, Contracts and Revenue 427-2901

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Accounting	Accrual Gathering & Reporting System (AGARS)	PWSS	This is a micro system used to gather accounts payable transactions that have missed the DFS monthly cut-off. There is no interface. Manual adjustments are prepared. **CONTACT:** Irvin Walters, Revolving Fund Accounts 422-0095
	Alberta Health Care Insurance Payment System	Health	An ADABASE online/batch system which processes requisitions for payment from Claims, Hospital Reciprocal Billing and Registration systems. Produces cheques and automatic deposits as well as management reports. **CONTACT:** Rob Jephcott 427-1048
	Contracts	Energy/Forestry	Micro system for recording and payment of contract services. **CONTACT:** Joan Gillard 427-3605
	CORAM Receipting System	Treasury	Used for systematically breaking down all funds received by Payroll and Pensions on a daily basis by act, employer/employees and deposit source/type. Assigns receipt numbers for audit purposes to each cheque for summarization on a daily and monthly basis. Resides on an IBM PC and is written in Basic. **CONTACT:** Don Ross 427-3354
	Corporate General Ledger	Alta Mortgage & House (Municipal Affairs)	All aspects of general ledger processing, from the setting up of accounts to file maintenance and ledger entries and reporting. It is a tape batch system, purchased from Computer Associates. (VAX 11/780/8600 Cluster) **CONTACT:** Information Systems Branch 427-4867
	CPD Information System	PWSS	The Computer Processing Division uses a mainframe system to gather all computer usage by Departments, etc. This is interfaced to DBS which produces the invoices. **CONTACT:** Bob Johnson, Capacity Management 427-2718
	DFS/CFS	Treasury	An on-line budgetary control, payment of accounts and general ledger system organized to allow for a two tiered chart of accounts, discretionary budgetary control below a mandated level, centralized cheque production and independent reporting. Interfaces with Salary, Wages, Public Accounts, Accountable Advances. Based on proprietary software with extensive custom modifications. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** F. Scarfone 427-0682

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Accounting	Distributed Document Processing System	Treasury	Read and microfilm negotiated cheques. Interface to Treasury Cheque Status System. NCR 7750 128K Processor with 9.8 MB. **CONTACT:** F. Scarfone 427-0682
	Financial System (DEFIS)	Energy/Forestry	Expenditure forecasting information system. Purpose is to assist financial analysis and planning. (Micro) **CONTACT:** Gail Mathews 427-3545
	Fish and Wildlife Vendor Accounts	Energy/Forestry	A micro based system that issues and records licenses to various vendors. The system also records the revenue received from the sale of these licenses. **CONTACT:** Betty Phillips 427-3602
	Fuel Inventory Management System (FIMS)	PWSS	This is a micro based system that the Government Garage uses to gather/record purchases of gasoline by Government Departments, Boards and Agencies. This information is interfaced to DBS which produces the invoices. **CONTACT:** Bob Shearer, Automotive Services 427-3996
	Fund Accounting	Labour	Maintenance of records and production of monthly financial reports (balance sheet, profit and loss, accounts receivables, etc.) for the Revolving Fund, Long-Term Disability Fund and Long-Term Disability Fund - Bargaining Unit. **CONTACT:** J. Fleming 427-8387
	General Ledger (GL/FICS)	Treasury	To record and control revenue and expenditures and prepare public accounts and financial statements. Interfaces with RICS and DFS. Based on proprietary software with extensive modifications. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** F. Scarfone 427-0682
	General Ledger (GL)	Culture	To assist in maintaining the general ledgers for SAJA, NAJA and PM&A. This package uses the entries made within AR, AP and IC instead of duplicating the entries they can be transferred. (ACCPAC) **CONTACT:** Aziz Alidina, Revolving Fund 427-2715

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Accounting	General Ledger Detail	U of A Hospitals	Maintaining general ledger including budget information and actual revenue and expenditures. Interfaces with Payroll, A/R, A/P, Cheque Writing, and Pharmacy Inventory. **CONTACT:** Director, Information Systems 492-6937
	Global Software Inc. General Ledger and Accounts Payable	Hail & Crop Corp.	General ledger and accounts payable package. (Global Software Inc). Interfaces with ACIS. **COMMERCIALIZATION STATUS:** Proprietary Software **CONTACT:** Darryl Gruntman 782-4661
	Grazing Utilization Invoicing System	Energy/Forestry	To keep a record of patron, livestock and supply information for the farmers and ranchers using the provincial grazing reserves in order to produce patron invoices at year end. **CONTACT:** Bill Irvine 427-3595
	Main Accounts Receivable System (MARS)	Energy/Forestry	A system providing a complete flow of cash through the Accounts Receivable System. Comprises revenue collection procedures and application of cash to accounts. The system records, classifies and summarizes all account transactions interpreting the results in compliance with applicable acts, regulations, policies and guidelines set by Treasury and Audit. **CONTACT:** J. Clerk 427-3604
	Program Accounts Receivable System (PARS)	PWSS	Modified version of PWSS MARS to accommodate Contract Accounting Section, Financial Services Branch, Finance & Administration. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Program Billing System (PBS)	PWSS	Modified version of DBS to accommodate Contract Accounting Section, Financial Services branch, Finance & Administration. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Recoveries	Family & Social Services	This system maintains records of all Income Support clients who owe the government money as well as recoveries made. Any Caveats or Agreements that were initiated by legal services are also recorded. Various reports are produced for the Recovery Unit. **CONTACT:** Peter Trommelen 441-6711
	Revolving Fund Accounting Reporting System (RFAB Reporting)	PWSS	Microcomputer based, extracts information from Treasury's Departmental Financial System and transfers data to Lotus 123 spreadsheet formats to produce monthly financial statements. **CONTACT:** Application Services Branch 427-4181

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Accounting	Self Pay Purchase Orders (SPPO)	PWSS	System to support Self Pay Purchase Orders and submit transactions to DFS/CFS. PC **CONTACT:** Management Services Branch, Systems Section 427-2222
	Self-Pay Purchase Order System	Energy/Forestry	A micro based system that reconciles processed SPPO's with bank statements. **CONTACT:** Cheryl Lund 427-3602
	Treasury Cheque Status System (TCSS)	Treasury	Records all cheques issued by Treasury and cheques cashed to determine balances and track outstanding cheques. Interfaces with DFS/AP. **CONTACT:** F. Scarfone 427-0682
	Utility Payment System	Energy/Forestry	A micro based system used to process and record all utility invoices for Energy/Forestry. **CONTACT:** Marilyn Emmerson 427-3605
Education	Alberta Correspondence School Administrative System	Education	To provide automated processing of students records, sales and shipment of course materials, accounting for student fees, and recording and control of student lessons, texts, and results. **CONTACT:** Ken Vandenberg 674-5333
	Diploma Exam Bar Code System	Education	A tracking and inventory system for Diploma Exam processing, using bar code technology. Written in Clipper, runs on microcomputer system. Interfaces with Students' Records mainframe system. **CONTACT:** Vic Parks 427-2948
	Energy Matters Computer Display	Energy/Forestry	Display energy conservation models to the public using micro computers. **CONTACT:** Ken Charters 427-5200
	Enrollments - Database	Education	To maintain student enrollments (ECS to Grade XII) by age, grade, sex, within schools and jurisdictions. Interfaces with Alberta Education Data Base. **CONTACT:** Penny Clark 427-2055
	Field Test Administration System	Education	Maintains inventory of Examinations Field Testing staff, examinations, supervisors, schools, materials, etc. Produces packing slips, routing list, etc. for administratin of field tests. **CONTACT:** Vic Parks 427-2948

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Education	Food Sanitation Education System	Health	This system tracks the qualifications of food handlers, generates various reports and produces certificates. **CONTACT:** James Steele 427-2643
	Projects & Building Quality Restoration Program	Education	To provide an inventory of all changes to existing facilities; to control expenditures thereof: and to monitor facility utilization. Interfaces with Facilities System & Education Data Base. **CONTACT:** Don Galloway 427-5745
	School and Jurisdiction - (ADABAS) Database	Education	Provide a framework for Alta Education DB (ADABAS) at the Central Computing Centre. School and jurisdiction, location, identification, administrators, etc. **CONTACT:** Reg Thom 427-5739
	School and Jurisdiction - (SUPRA) Database	Education	Provide framework for Alberta Education database. School and jurisdiction location and status. Interfaces with Education Database. **CONTACT:** Reg Thom 427-5739
	School Energy Conservation	Energy/Forestry	Development and demonstration of micro software for school systems, to educate children about value and methods of energy conservation. **CONTACT:** Donald Wharton 427-5200
	School Facilities	Education	To provide an inventory of all school facilities in Alberta. Interfaces with Projects & Building Quality Restoration Program. **CONTACT:** Don Galloway 427-5745
	School Programs	Education	Collection, monitoring and reporting of courses taught at the junior and senior high school level at each school. **CONTACT:** Don Galloway 427-5745
	Student Marks Reporting System	Education	Intended for distribution to secondary schools to be used for maintaining records of students marks, generation of student report cards, and reporting of student's results to the Department via floppy disks. Apple II+, Apple IIE with 1-4 Disc Drives & Printer. **CONTACT:** Don Galloway 427-5745

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Education	Student Records System – Database	Education	Perform all functions related to departmentally – administered examinations, as well as maintaining senior high school marks for analysis and for production of transcripts and diplomas. Interfaces with Schools & Jurisdictions System. **CONTACT:** Pat Ford 427–5306
	Students Information System (SIS)	Advanced Education	To maintain students' marks, attendance, enrolment, time–tabling and statistical reporting on the student population. Interfaces with Department of Education Student Information System. **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** S. Rajwani 427–7147
	Welders Exams	Labour	Microcomputer data storage and retrieval system for all levels of pressure welders. This system greatly improves the processing of applications, examination and certification of pressure welders formerly performed manually. The extraction of statistical data for Annual reports or at the request of private industry is now possible. **CONTACT:** R. Roseberg 427–6855
Engineering	3–Centre Curve Program	Transportation/Utilities	This system performs 3–centered curve calculations for symmetrical and asymmetrical curves. This system is also available for micros. **CONTACT:** Don McTavish 427–8690
	3TM Traverse Index System	Transportation/Utilities	The Department is constantly adding to and revising its collection of 3TM traverse data. Upon request, plots accompanied by index listings are sent to private surveying companies to update their own 3TM Traverse information. Current copies of the plots and indexes are kept by the Department. **CONTACT:** Don McTavish 427–8690
	Air Void in Asphalt Calculation System	Transportation/Utilities	This program uses the theoretical maximum specific gravity of an uncompacted bituminous paving mixture to find the proper percentage of air void for a particular mixture of asphalt. **CONTACT:** Don McTavish 427–8690
	Asphalt Reporting System	Transportation/Utilities	The system summarizes asphaltic test results such as penetration, viscosity, specific gravity, solubility, soft point, ductility, distillation, etc., obtained from different types of asphalt gauges. **CONTACT:** Don McTavish 427–8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Benkelman Beam System	Transportation/Utilities	The Benkelman Beam System is a small batch computer system used by the Surfacing Section of the Materials Engineering Branch to generate Benkelman Beam Testing Reports and plots from the data. **CONTACT:** Don McTavish 427-8690
	Biaxial Column Design	Transportation/Utilities	This program is used to analyze any (including hollow) shaped pier for biaxial moment (imperial and metric). **CONTACT:** Don McTavish 427-8690
	Boiler Design Survey	Labour	Industrial Engineering programs for the checking of stress levels and code requirements of pressure vessels and allied components. Victor 9000 256K RAM. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Bridge Continuous Girder Analysis	Transportation/Utilities	This program is used to analyze continuous girder bridges for both dead and live loads (imperial and metric). Calculations of shear, moments and dead load deflections due to applied loads are performed. Also performed are analyses of standard and non standard truck and lane loads. **CONTACT:** Don McTavish 427-8690
	Bridge Deck Equipotential Plotting System	Transportation/Utilities	This program calculates equipotential contours and plots them using GPCP II. Input data is obtained from Copper Sulphate Electrode (CSE) observations for a bridge. The plots are used to determine the condition of a bridge deck. **CONTACT:** Don McTavish 427-8690
	Bridge Truss Rating Programs	Transportation/Utilities	From a simple input, these programs evaluate the floor system of trusses, generate STRUDL commands, invoke STRUDL, post-process STRUDL output and summarize load rating of a truss in terms of an 'H' or 'HS' live loading. **CONTACT:** Don McTavish 427-8690
	Co-Ordinate Geometry for Surveyors	PWSS	Interactive program to solve surveying networks and loops. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Coal Analysis System	ERCB	Maintenance and reporting of coal mining data. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Coal Reserves Appraisal System	ERCB	Computer assisted reserves evaluation and mapping of coal resources. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Computer Assisted Log Evaluation	ERCB	Analysis of well logs to determine oil/gas reserves. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Concrete Test Cylinder Analysis	Transportation/Utilities	All concrete pours for bridge work require sampling of the concrete, making and curing of concrete test cylinders, slump tests, air content tests, and strength tests in accordance with CSA Standards. This system performs a statistical analysis of the test results, providing a more meaningful picture of them. **CONTACT:** Don McTavish 427–8690
	Core Analysis Data System	ERCB	Maintains records of core sample analyses for wells in Alberta. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Corebits System	Transportation/Utilities	The purpose of this program is to evaluate the performance of diamond coring bits in respect to number of feet cored per bit. The program is run about twice per year. **CONTACT:** Don McTavish 427–8690
	Culvert Design (Transportation)	Transportation/Utilities	This is a mainframe based on–line system and provides a modularised approach to Culvert Design. The system consists of 4 subsystems – Channel Hydraulics, Hydraulics, Geometry and Structural Subsystems. The last one includes design and analysis using AASHTO, Ontario and SCI Design Codes. **CONTACT:** Don McTavish 427–8690
	Culvert Design – Structural	Transportation/Utilities	Culvert Analysis and Design System; a modern approach for the structural design and analysis of buried culverts. There are two programs, one for Imperial units and one for Metric units. The programs were supplied by the Federal Highways Administration of the U.S. Federal Government. **CONTACT:** Don McTavish 427–8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Culvert Design System (Wyoming)	Transportation/Utilities	This system is used to design various types of culverts and analyze various hydrograph relationships, culvert shapes, material and inlet types. The system was acquired from the Wyoming Department of Highways in 1980. **CONTACT:** Don McTavish 427-8690
	Curve Deflection Angle System	Transportation/Utilities	This program is used to calculate the deflection angles and chord lengths required to lay out roadway curves in the field. The calculations are done on centerline and on offset baselines. The program is for metric curves only. This system is also available for micros. **CONTACT:** Don McTavish 427-8690
	Design Earthwork System	Transportation/Utilities	The system enables the user to perform detailed design of highways or to assess the effect of minor or major changes in highway alignment, terrain, etc., on the overall design. For the most part, the actual design is done using ROADS/COGO subsystem of ICES which is maintained by McDonnel Douglas Corp. (MCAUTO). A number of in-house programs are also used to make DES more responsive to the design requirements of the Department. **CONTACT:** Don McTavish 427-8690
	Design Survey Logbook	Labour	Microcomputer automation of official logbook as maintained by the Design Survey Group. It provides a means of log entry as well as statistical data extraction for various official department reports. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Dynaflect - Roadway Surface Deflections	Transportation/Utilities	This program is used to analyze DYNAFLECT deflection readings to determine the condition and load capacity of pavement surfaces. **CONTACT:** Don McTavish 427-8690
	E20-II Software Package (STATISTIS)	PWSS	Engineering H.V.A.C. design analysis package - load estimation, operating cost analysis, pipe and duct design, and equipment selection on a standalone micro-computer. (Carrier Corporation) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Electronic Fieldbooks System	Transportation/Utilities	Electronic Fieldbooks are programmed hand-held data collection devices used for collecting survey data on construction sites. The survey data is then transmitted to the mainframe (IBM) where it is further processed. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Energy Systems Analysis System	PWSS	Merriweather analysis of building performance. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Engineering/Technical Applic.	ERCB	Programs pertaining to various reservoir engineering applications in the field of petroleum engineering. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Enhanced Recovery Surveillance	ERCB	Reporting of production and injection performance of each enhanced recovery scheme. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Final Earthwork Quantities System (FEQS)	Transportation/Utilities	This system is used to process the field cross section survey data and produce reduced cross section data, cross section plots, and computed final quantities (metric and imperial). **CONTACT:** Don McTavish 427-8690
	Geometrics Program	Transportation/Utilities	The program will solve some geometrical problems. The basis for the system is co-ordinates of points and a simple command language. The programs have been patterned after COGO and although limited in scope relative to COGO it should provide a quite powerful and time saving tool. **CONTACT:** Don McTavish 427-8690
	Geotechnical Project Control System	Transportation/Utilities	The geotechnical section of Materials Engineering Branch has responsibility for several projects. A computer program was developed in November 1980 with the Department, to enable transition from manual data recording and reporting to a process of computerized data manipulation. This program is being used to monitor and control costs of geotechnical projects. **CONTACT:** Don McTavish 427-8690
	Hydraulics of Bridge Waterways	Transportation/Utilities	This program was received from the U.S. Department of Commerce, Bureau of Public Roads in 1966. The program is used for the hydraulic analysis of backwater that can be produced or caused by a bridge. The program has been modified to handle the input slightly differently and has been converted to handle metric as well as imperial. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Hydrologic Program (HEC-2, HEC-6)	Transportation/Utilities	To calculate water level profiles in water courses including the effects of construction of bridges. **CONTACT:** Don McTavish 427-8690
	ICES - COGO / ROADS	Transportation/Utilities	ROADS (Roadway Analysis and Design System) is a comprehensive and integrated engineering system for use in solving problems associated with the location and design of transportation roadways. The system can be used from the early planning phases through to the design and specifications phases. **CONTACT:** Don McTavish 427-8690
	ICES - Slope	Transportation/Utilities	ICES - SLOPE is a small ICES subsystem used for earth slope stability analysis. It runs under the McAuto ICES Executive System. McAuto provides the User Manual. **CONTACT:** Don McTavish 427-8690
	ICES STRUDL	Transportation/Utilities	ICES STRUDL performs calculations associated with design and analysis of engineering structures. Its primary use in Alberta Transportation is for analyzing bridges after design. It is also used as a component of the bridge truss rating system. Obtained from McDonnell Douglas Automation. **CONTACT:** Don McTavish 427-8690
	Laboratory Data Acquisition System	Transportation/Utilities	This is a Hewlett Packard based microcomputer system which comsists of a laboratory data logger and specialized application software for performing geotechnical tests including unconfined compression, triaxial and direct shear. **CONTACT:** Don McTavish 427-8690
	Lateral Buckling of Pony Truss Bridges	Transportation/Utilities	This program is used to analyze the lateral (out of Plane) buckling of pony truss bridges using a modified version of Bleichs method. **CONTACT:** Don McTavish 427-8690
	Mineable Oil Sands Appraisal	ERCB	Computer assisted reserves evaluation and mapping of oil sands deposits. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Nuclear Gauge Calibration Program (CALIB)	Transportation/Utilities	This program performs calculations associated with a Series 2400 nuclear gauge manufactured by M & L Testing Equipment Co. Ltd. The gauge is used to measure the moisture and density of asphalt and soil. **CONTACT:** Don McTavish 427–8690
	Oil Reserves System	ERCB	Maintenance and reporting of oil reserves data. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	On–Line Photogrammetry Data Acquisition	Transportation/Utilities	A system to collect and store data in terms of co–ordinates from air photographs. **CONTACT:** Don McTavish 427–8690
	Ontario Structural and Soil Programs	Transportation/Utilities	To handle various aspects of bridge design. **CONTACT:** Don McTavish 427–8690
	Overload System	Transportation/Utilities	This system is comprised of a series of programs required to evaluate bridges on Alberta roads, in conjunction with the movement of overloads. There are separate programs required for each type of bridge. **CONTACT:** Don McTavish 427–8690
	Pavement Design Programs	Transportation/Utilities	The SAMP6 program is used to provide the design engineer with a number of pavement design strategies. That is, the program gives a pavement design, considering available materials that can be maintained above a specified level of serviceability within a specified degree of reliability, and at a minimum overall total cost. For a given design analysis, both initial construction costs and future costs are computed for the design strategies. **CONTACT:** Don McTavish 427–8690
	Photogrammetry Project Status System	Transportation/Utilities	This system reports the status of triangulation, plotting and scribing projects carried out by the Photogrammetry Section. **CONTACT:** Don McTavish 427–8690
	Photomontage Resection	Transportation/Utilities	A highway photomontage is a composite picture made by generating a highway perspective plot using a computer to the same perspective of an oblique terrain photograph and superimposing it on the photograph. **CONTACT:** Don McTavish 427–8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Pipe Stress Analysis	PWSS	Interactive program to analyze pipe stress. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Polynominal Least Squares Regression System	Transportation/Utilities	The program performs a polynomial least squares regression. For a specified degree, the program determines the polynomial which best expresses the dependent variable as a function of the independent variable. **CONTACT:** Don McTavish 427-8690
	Pool Performance System	ERCB	Analysis of Pool performance. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Present Performance Rating Program	Transportation/Utilities	This system is used to statistically calculate and analyze a group of panel rates mean subjective evaluation values, used to determine the riding quality of pavement. **CONTACT:** Don McTavish 427-8690
	Prestressed Girder Analysis System	Transportation/Utilities	This program is used for analysis of simply supported prestressed girders as per ASSHTO 1973 specifications (metric and imperial). **CONTACT:** Don McTavish 427-8690
	Prestressed Girder Analysis System (Sask.)	Transportation/Utilities	This system is used to analyze the critical section and any other sections for stresses at defined stages during the prestress girder life. It calculates the ultimate moment capacity of the critical section and designs stirrups (per AC1) for the girder. The system was obtained from the Department of Highways, Sask. in 1976 and enhanced. **CONTACT:** Don McTavish 427-8690
	Quantities - Standard Sections, On C.L.	Transportation/Utilities	Given a design cross section, this program outputs a table of cut and fill varying from 0 to 30 meters in increments of 0.25 meters. The terrain cross section is assumed to be flat. The output table is used to manually obtain rough estimates of earthwork quantities for initial evaluation of roadway locations. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Roadmeter Analysis Program	Transportation/Utilities	This system calculates the roughness or smoothness of highway pavement. The system uses three formulae to compute the Riding Comfort Index, all three use the same variables: readings taken from roadmeters. CONTACT: Don McTavish 427-8690
	Skid Resistance Program	Transportation/Utilities	The Materials Engineering Branch has purchased a Mumeter Skid Tester for measuring the slipperiness of provincial paved roadways. Therefore, this system will store, retrieve and analyze the test data. In addition, the system will be required to plot and summarize the test results which are needed for pavement design purposes. CONTACT: Don McTavish 427-8690
	Slope Indicator Program	Transportation/Utilities	This program calculates the deflection and changes from slope indicator readings which are taken on different dates at various depths of both north-south and east-west direction in the same well. Summary plots are also available. CONTACT: Don McTavish 427-8690
	Soil Classification System	Transportation/Utilities	This system logs all soil testing samples taken from highway/bridge construction sites and gravel pits in the province. Soil classification reports are then generated. CONTACT: Don McTavish 427-8690
	Soil Survey Classification System	Transportation/Utilities	This system assists laboratory personnel in the classification of soil samples, and estimates potential frost action, optimum moisture content, erosion resistance and maximum density. CONTACT: Don McTavish 427-8690
	Strength of Design of Concrete Columns (Metric)	Transportation/Utilities	The purpose of this program is to give engineers the capability to design reinforced concrete compression members to resist a given combination of loadings or to investigate the adequacy of a given cross section to resist a similar set of loadings. CONTACT: Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Tellurometer & Geodimeter Program	Transportation/Utilities	This is a on-line engineering application system. The first program is for the Model CD6 Tellurometer, which computes sea level distances, arc distances, and horizontal mean elevation distances from measurement readings recorded by survey personnel. The second program for Tellurometer Model MRA-101 will calculate the distance between two points based on readings from the instrument. The third for Tellurometer Model CA-1000 is to reduce the data to feet and meters. The fourth program for Geodimeter Model 78 reduces slope distance readings to horizontal distances at sea level and the mean of ground elevation. **CONTACT:** Don McTavish 427-8690
	Transyt 7F System For City of Red Deer	Transportation/Utilities	TRANSYT is a traffic signal optimization model originally written in Great Britian by the Transport and Road Research Laboratory. Version 7 of the model was modified by the TRC to improve the utility in the U.S. Modifications included reorganization of inputs, U.S. signal timing conventions, improved output formats, estimates of fuel consumption and the provision of time-space diagrams. **CONTACT:** Don McTavish 427-8690
	Traverse - 3TM Calculations	Transportation/Utilities	The program calculates the coordinates of the points on a traverse and reduces them to a theoretical grid. The present version of the program accepts metric input and produces metric and imperial output. **CONTACT:** Don McTavish 427-8690
	Traverse Program	Transportation/Utilities	The purpose of the program is to calculate latitudes, departures and co-ordinates of traverse points given the azimuth and length of each course in the traverse. An error of closure will also be calculated if a check traverse is input immediately behind the surveyed traverse. **CONTACT:** Don McTavish 427-8690
	Truck Haul System	Transportation/Utilities	This system is a micro based on-line system which calculates and summarizes tonnes and tonnekilometres for a Truck Hauling project. **CONTACT:** Don McTavish 427-8690
	Truss Rating Summary	Transportation/Utilities	This system produces summary reports on all the load ratings of trusses. It also provides the disposition and/or last rating of each truss. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Engineering	Urban Transit Planning System (UTPS)	Transportation/Utilities	A package similar to TRIPS but with more emphasis on public transit facilities. CONTACT: Don McTavish 427-8690
	Vertical Curve Template System	Transportation/Utilities	This program calculates elevations and stationing along a curve for both crest and sag curves. It will also calculate stopping and passing sight distances. It plots the curve to be used in making plastic templates. CONTACT: Don McTavish 427-8690
	Visual Condition Rating Program	Transportation/Utilities	This program calculates and plots the visual condition rating from input visual rating of provincial highways. CONTACT: Don McTavish 427-8690
	Wave Equation Analysis of Pile Driving System	Transportation/Utilities	This system performs dynamic analysis of inpact driven piles. The results of the analysis consists of pile stresses, velocities and penetrations. Results can be obtained in printed reports or in plotted graph forms. CONTACT: Don McTavish 427-8690
	Weigh in Motion Scale Data Acquisition System	Transportation/Utilities	The system provides the data translation facility for the Weight In Motion scale data into machine readable form. The system also has a dataset compare utility incorporated. CONTACT: Don McTavish 427-8690
Financial Admin.	(Rev. Admin.) Cash Receipts	Treasury	To record incoming cash remittances and allocate them to the correct debtor/collector/taxpayer account. The system is based on a Wang VS system using COBOL. CONTACT: M. Tremblay 427-3244
	(Rev. Admin.) Crown Debt Collections System	Treasury	To administer the crown debt collection functions. The system keeps track of the collection activities and balance of each debtor account. The system is based on a Wang VS system using COBOL. CONTACT: Dale Moll 422-0222 M. Tremblay 427-3244
	(Rev. Admin.) Farmers Benefits Control System (FBCS)	Treasury	To record Alberta farmers eligible for receiving benefits in purchasing farm fuel at discounted price. The system is based on IBM mainframe using ADABAS/NATURAL. CONTACT: J. Parton 427-9416

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	(Rev. Admin.) Heating Oil System (HOIL)	Treasury	To keep track of the 4000 or so users of home heating oil receiving benefits by purchasing fuel at a discounted price. The system is based on an IBM mainframe using ADABAS/NATURAL. **CONTACT:** J. Parton 427-9416
	(Rev. Admin.) Hotel Room Tax (HRT)	Treasury	To record the tax roll of entities which offer accommodation subject to tax and record tax returns, remittances and commissions. The system is based on a Wang VS system using COBOL. **CONTACT:** Dale Moll 422-0222
	(Rev. Admin.) Independent Agents Systems	Treasury	To maintain a file of independent bulk dealers of fuels and to monitor their monthly claims and level of accountable advance. The system is based on a Wang VS system using COBOL. (About 200 bulk dealers) **CONTACT:** Dale Moll 422-0222
	(Rev. Admin.) Interprovincial Carriers (IPC)	Treasury	To record transport operations that travel interjurisdictionally and are eligible for prorate of fuel tax. Records returns, remittances and refunds. The system is based on a Wang VS system using COBOL. **CONTACT:** Dale Moll 422-0222
	(Rev. Admin.) Off-Road Fuel User (ORFU)	Treasury	To record entities which can purchase marked tax exempt fuel. The system is based on an IBM mainframe using ADABAS/NATURAL. **CONTACT:** J. Parton 427-9416
	Accountable Advances	Treasury	This system keeps account of all government monies advanced to Government Departments, employees, agencies, or crown corporations. Interfaces with DFS/CFS. **CONTACT:** F. Scarfone 427-0682
	Accounting Officer Review System	Health	A PC/FOCUS system which allows accounting officers to review payment transaction records and release them to CFS/DFS for processing of payments. **CONTACT:** Rob Jephcott 427-1048
	Accounting Recurring Payment System	Health	A PC/FOCUS system which processes and generates payment transactions to facilities - Hospitals, Nursing Homes, Health Units. **CONTACT:** Rob Jephcott 427-1048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	Administration Database (ADMN)	Culture	To assist in maintaining the budget information for Supply and Services, fixed costs and fixed assets. (CYBER – BASIS) **CONTACT:** Paul Koch, Financial Administration, Tyrrell Museum 823–7707 RITE – 164–1271
	Administrative Levy System	ERCB	ERCB tax levy system. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Alberta Air Medical Operations (ALAMO)	Health	A PC/FOCUS system which tracks, monitors and generates payment transactions for air ambulance services. **CONTACT:** Rob Jephcott 427–1048
	Alberta Assured Income Plan	Family & Social Services	This system gives extra benefits to all recipients of the Federal Guaranteed Income Supplement program in Alberta. Computer tape containing monthly information is made available by the Federal Government. The cheques are created after applying any outstanding repayments as well as sheltering. **CONTACT:** Peter Trommelen 441–6711
	Alberta Crop Insurance System (ACIS)	Hail & Crop Corp.	Processing of applications for crop or hail insurance from Alberta farmers. Billing of premiums, processing of claims and providing statistics on losses, premiums and coverage. Interfaces with Accounting IV. **CONTACT:** Jack Suddards 782–4661
	Alberta Health Care Interface	Family & Social Services	Provides a file to AHCIP of all Income Support clients eligible for Medicare. **CONTACT:** Peter Trommelen 441–6711
	Alberta Municipal Financial Information (AMFIS)	Municipal Affairs	This system contains municipal financial statements and budget information on an IDMS database, which is used to provide financial analyses and statistics on current and historical (5 years) data. **CONTACT:** Lloyd Livingstone 427–4868

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	Alberta Stocks Savings Plan System (ASSP)	Treasury	To process dealer supplied data pertaining to the Alberta Stock Savings Credits claims by investors. A consolidated tape is produced for Revenue Canada Taxation for further processing. The system is developed in NATURAL 4GL. CONTACT: J. Parton 427-9416
	Assessor Costing System	Municipal Affairs	To record and report the activities and working locations of the assessors employed by Department of Municipal Affairs and bill the municipalities for assessment services provided on their behalf. CONTACT: Lloyd Livingstone 427-4868
	Assured Income for the Severely Handicapped (Cost Sharing)	Family & Social Services	This system accumulates and monitors expenditures for the Assured Income for the Severely Handicapped (AISH) program as well as calculates cost sharing with the Federal Government. CONTACT: Peter Trommelen 441-6711
	Audit Package	Family & Social Services	Automated system control to ensure file and system integrity. All production jobs in Systems & Procedures are executed through the Audit Package. CONTACT: Peter Trommelen 441-6711
	Audit Worksheet	Treasury	A microcomputer system based on Symphony. To assist auditors in preparation of audit worksheets and calculations. CONTACT: S. Young 427-0491
	Automobile Taxable Benefits System	Treasury	An on-line automobile taxable benefits calculation program used to verify Alberta government MLA's reported benefits. The system provides calculations for both owned and leased vehicles. Resides on the Payroll and Pensions local area network and is written in the Quickbasic language. CONTACT: Don Ross 427-3354
	Bank Account System	Treasury	Maintains a record of all non-financial data for each active bank account. Data includes signing authorities, account name, bank and branch number. Data is available on-line or by adhoc reports. (Micro) CONTACT: P. Day 427-9920

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	Bank – File Convert/Compare System	Treasury	To facilitate the reformatting and reporting of transactions downloaded from the bank's system. Produces a branch posting report that includes daily balances and transfer amounts for each account. (Micro) **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** Allen Benbow 427–9920
	Bond Control System	Consumer & Corp Affairs	Maintain records of bonds posted by licencees under Department regulations. Victor 9000 Custom Built (MS BASIC). Used by Licencing Branch. **CONTACT:** Harold Baker, Licencing
	Bond Swap/Duration Weightful Swap System	Treasury	Facilitates the recording and reporting of all Bond swaps. Allows the analysis of two or more bonds included in an existing or proposed swap by determining the duration weighted yield of each instrument. (Micro) **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** Allen Benbow 427–9920
	Budget and Reporting	Family & Social Services	A MVS/FOCUS baced system to administer the budget and expenditure monitoring process within the department. **CONTACT:** Peter Trommelen 441–6711
	Building Management Information System	PWSS	This system produces several cost summaries using DFS data, building data, and special project data provided by the Property Management Division. **CONTACT:** Management Services Branch, Systems Section 427–2222
	C.O.M. System	PWSS	System accumulates charges to various C.O.M. users and prepares a monthly file that is taken into the Billing System. **CONTACT:** Management Services Branch, Systems Section 427–2222
	Cash Management System	Consumer & Corp Affairs	DBase III system used by Alberta Securities Commission to control funds received along with applications for service. **CONTACT:** Sue Churchill, Securities Commission

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	CCITF System	Treasury	To facilitate the management, control and reporting of funds managed under the Consolidated Cash Investment Trust Fund. Includes the monitoring of individual account balances, income earned and its allocation to participants. (Mainframe/Micro) **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** Allen Benbow 427-9920
	Claims in Microfilm	Health	A system to enable microfilm retrieval from roll film. Operates in a batch mode. **CONTACT:** Rob Jephcott 427-1048
	Claims in Process System	Health	A system of control for claims in process. Operates in a batch mode using an R.E.I. Optical Scanner system to capture and transmit claim details to computer system. Purpose - 1) control of volumes; 2) management information; 3) practitioners information; 4) inventory. Interfaces with Claims Processing System. **CONTACT:** Rob Jephcott 427-1048
	Claims Processing System	Health	A system of claims collection, validation, assessment and preparation of payment requisitions for health services to registrants and practitioners. Includes claim adjustments, transfers, inquiries, portion of medical reciprocal billing and archiving. **CONTACT:** Rob Jephcott 427-1048
	Client Index (Income Security)	Family & Social Services	Maintains a record of the Income Support clients and their involvement with that program. Nightly updates provide validation of information to the DDS System. The DDS System in turn, provides input to the Client Index System on changes to the Income Security clients. Mainframe, MINI - MDS Mohawk, IBM 9370. **CONTACT:** Peter Trommelen 441-6711
	Clinical Lab System	U of A Hospitals	Analyzing clinical lab utilization and readings, providing measures of various workloads and data on the range of values obtained for each type of test, summarizing and pricing of outside services rendered by clinical labs, billing for outpatients and the Red Deer and Sturgeon Hospitals, billing of clinical lab services to various hospitals via referred mail, collecting data for Microbiology and Anatomical Pathology. **CONTACT:** Director, Information Systems 492-6937

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	Computer Systems Budget System	Energy/Forestry	Provides information on all costs incurred in the development, operation and maintenance of computer systems. System provides monthly, year-to-date expenditures and budget information on a monthly basis. This system is used to provide historical information for budget forecasting and a means of controlling computer utilization. **CONTACT:** Skip Brandon 427-3537
	Consultant Billing	PWSS	Provides current, up-to-date cash flow information on consultants working for Public Works, Supply and Services. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Contract Information System (CIS)	Recreation and Parks	Provides various user groups with information pertaining to contracts issued by the Department. It also produces reports giving the dollar amounts paid, outstanding and committed to particular contracts. **CONTACT:** Co-ordinator, Contracts and Revenue 427-2901
	Contracts Registry (CONR)	Environment	Department contract admin. computer system. **CONTACT:** Jim Carter 427-8865
	Corporate Housing Information System (CHIS)	Alta Mortgage & House (Municipal Affairs)	To provide on-line rents receivable system for directly administered housing units. (VAX 11/780/8600 Cluster) **CONTACT:** Information Systems Branch 427-4867
	Corporate Income Tax Administration System (CITAS)	Treasury	To support the day to day operation of CTA in administering the Alberta Corporate Income Tax. Major subsystems of CITAS consist of: Accounting, Taxroll, Assessment, Re-assessment, Collections, Audit, Revenue Canada Interface, Online query, AT-1 Tracking, Objections & Appeals, RTC Associations, Common Interest Calculations, Online Interest Calculations Reporting, Online update and Common services. **CONTACT:** J. Parton 427-9416
	Corporate Management Information System (CMIS)	Treasury	To produce monthly management reports based on information from a wide variety of sources. The reports are primarily for senior executives and the minister. This system is developed on a micro LAN environment. **CONTACT:** J. Parton 427-9416

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	Cost Details	Family & Social Services	To collect detail information of all payments made to Income Support clients. **CONTACT:** Peter Trommelen 441-6711
	CRC Grant System	Culture	To assist the Field Services Branch with more effective and efficient information storage and retrieval capabilities. The system also provides the capability to produce reports and monitor the progress of the CRC Grant Applications. (FOXBASE) **CONTACT:** Heather Skotnitsky, Field Services, Calgary 297-3974 RITE - 161-3974
	Credit Unions Monitoring System (CUMS)	Treasury	(FIN INST) To maintain a database of Credit Union financial reports for the purpose of monitoring the financial strength of credit unions and to ensure compliance with regulatory requirements. To produce management reports on a consolidated basis. The system is developed using dBase III Plus. **CONTACT:** G. Malcolm 427-8507
	Current Revenue Refunds Proc.	Treasury	On-line data entry system used to both process payments of revenue refunds and update the Revenue Information Control system. Interfaces to RICS, DFS/CFS. **CONTACT:** F. Scarfone 427-0682
	Daily Deposit On-line System	Treasury	An on-line data entry system used by the Central Revenue office to record Government of Alberta receipts. Interfaces to departmental general ledgers and the central Revenue Information Control System (RICS). **CONTACT:** F. Scarfone 427-0682
	Data Decision Sheet (Income Security) (DDS)	Family & Social Services	The main Income Support System which records all clients and is the basis for the monthly payroll run. Nightly update with validation for new transactions against the Client Index Master. Provides input to the DOC, Client Index, Recoveries, Cost Detail and DFS/CFS systems. Mainframe, MINI - MDS Mohawk, IBM 9370. **CONTACT:** Peter Trommelen 441-6711
	Data Matching	Family & Social Services	Provides for cross-matching of Income Support clients to clients registered with external financial support agencies. Current linkages are to UIC and the Student Finance Board. **CONTACT:** Peter Trommelen 441-6711

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Financial Admin.	Day Care Information System (DCIS)	Family & Social Services	The DCIS system records the attendance by children in registered Day Care facilities and provides payments to the facilities for operating allowances and client subsidies. The system also provides for licensing of Day Care facilities and monitoring of complains about these facilities. (Mainframe) **CONTACT:** Ellen Pedersen 441-6711
	Debenture System	Treasury	To facilitate the management, control and cheque issuance of dividends due to holders of debentures which are in the custodial control of the Securities Administration Office. (Micro) **CONTACT:** Allen Benbow 427-9920
	Debentures and Short Term Loans – Database	Education	To provide an inventory of all debentures held by school jurisdictions relative to capital construction. Interfaces with Facilities & Projects. **CONTACT:** Horst Lehman 427-7235
	Debt Management System	Treasury	To facilitate the contract management, accounting and audit functions for the orderly recording, reporting and monitoring of the Province's Debt Program. (Mainframe) **COMMERCIALIZATION STATUS:** Leased Software **CONTACT:** Allen Benbow 427-9920
	Dental Payment	Family & Social Services	Assists in preparing dental invoices for Income Support clients for input to DFS/CFS. **CONTACT:** Peter Trommelen 441-6711
	Departmental Billing System (DBS)	PWSS	The system provides for the Revolving Fund billing of goods and services to organizational units within the Government of Alberta. Interfaces with A/R, G/L. **CONTACT:** Management Services Branch, Systems Section 427-2222
	District Office Cheques (DOC)	Family & Social Services	This system validates and records all one-time cheques issued by the district office to clients on social allowance. Interfaces with DDS System, Cost Details. **CONTACT:** Peter Trommelen 441-6711
	Dividend Record System	Treasury	Maintains a record of dividends declared on issues held by Alberta Treasury. Produces reports for expected dividends and tickets for data entry to the Investment System. Data is available on-line. (Micro) **CONTACT:** Allen Benbow 427-9920

SYSTEMS INVENTORY

	Geographic Data Process and Plot (G.D.P.P.)	Agriculture	Provide high quality geographic mapping facility. Maps can be plotted on various plotters or viewed on the terminal. Provides options for scale, size, colour, various grids, rivers, highways and boundaries. **CONTACT:** Keith Toogood 427-2101
	Geographical Guide System	Energy/Forestry	A batch inventory of geographical names and topographical features of Alberta used for preparation of maps. **CONTACT:** Mike Wells 427-6467
	Graphics Display Software	Transportation/Utilities	This on-line program is used to display plot files on a RPQ graphics terminal. This process can be used to: preview plots generated by production systems, and help designers finalize plots before they are plotted on the Calcomp plotter. **CONTACT:** Don McTavish 427-8690
	Interactive Graphics and Mapping System	Energy/Forestry	To generate Alberta large and small scale (cadastral) maps which are used throughout the Alberta Provincial Government. Maps are also supplied to the private sector. Turnkey system. **CONTACT:** D. Anderson 427-6467
	Pipelines Geographical Database	ERCB	Geographical representations of pipeline routes for on-line retrieval and mapping of pipelines and other base map information for various polygonol areas of the province. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Tellagraf (TGRF)	Environment	Provides quality computer graphics and plotting facilities. **CONTACT:** Jim Choles 427-6280

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Graphics	Transportation Interactive Graphics System	Transportation/Utilities	This interactive graphics system consists of "VAX" unit workstations, personal computers and plotters. It provides design and drafting functions in support of highway construction programs. **CONTACT:** Dave Hargreaves 427-8690
Human Resources	A.P.I.X.	Personnel Admin.	To provide cross Government human resource information. Data is based on position and employee information. Benefit data, staffing data and wage data are also available. This is an on-line IDMS based system which interacts with the Treasury Payroll System, the Absent Time Reporting System (ATRS) and the Personnel Information Access System (PIAS). **COMMERCIALIZATION STATUS:** Confidential **CONTACT:** Frank Robert 422-1131
	Absence Management System	Solicitor General	This micro based system supports the record keeping functions related to the monitoring of illness related absences for the purpose of management information. This system is operational in the Personnel offices in Edmonton and Calgary. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427-0366
	Absent Time Reporting System	Labour	Accesses the government wide ATRS developed through central PAO to provide a method of capturing and recording departmental employee specific absent time. Provides the ability to download data to a micro system which reports on branch and department absenteeism statistics. **CONTACT:** D. StArnaud 427-8391
	Absent Time Reporting System	Personnel Admin.	To provide a standard method of recording employee absence information for all government departments which fall under the Public Service Act. Information will enable the government to determine the actual cost of absenteeism for every type of absence taken. System is based on rules and regulations provided by the Master Agreement and the 12 subsidiary agreements. Interfaces with Treasury Payroll System. **COMMERCIALIZATION STATUS:** Confidential **CONTACT:** G. Heise 427-8270
	Absentee Report	AADAC	A preliminary absenteeism report has been established on the IBM XT, with further development needed to input data necessary for reporting purposes. **CONTACT:** J. Heamden 427-7935

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Human Resources	ATRS Reporting	Health	This system utilizes data extracts from the ATRS system and produces a report for every employee listing their entitlement balances on a semi annual basis. **CONTACT:** Terry Oakes 422-9449
	Biographical Information System	Education	Maintains biographical information on employees (including education and work experience as well as data from APIX). Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
	Certified Personnel Resources	Education	Maintains information on Certificated Educational Personnel in Alberta. Generates Teachers' Certificate and Letters of Authority. Provides data for statistical reference and analytical purposes. Interfaces with Statistics Canada, Education Data Base, Alberta Teachers' Association, and Teachers Retirement Fund. **CONTACT:** Susan Kropfreiter 427-2045
	Classification Tracking	Education	Maintains information on reclassifications of positions. Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
	Classification Tracking System	Health	This system tracks changes in the classification of Alberta Health employees. **CONTACT:** Vernon Gee 427-1524
	Collective Bargaining - Archives	Labour	A batch system that records and reports all Collective Agreements filed by the Department of Labour in the Provincial Archives. Listings produced are used by the public and the Department to obtain copies of the stored agreements. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Commissioner for Oaths	Attorney General	To record and maintain information on each Commissioner for Oaths in order to print certificates for new or renewed appointments and to print renewal forms for all appointments which are about to expire. **CONTACT:** Howard Brinton
	Competitions Database	Education	Maintains a file of all competitions and applicants. Generates letters to applicants and produces statistics. Uses dBase IV and interfaces with APIX. **CONTACT:** Brad Vergo 427-2058

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Human Resources	Course Tracking System	Health	This system tracks courses taken by Alberta Health employees. **CONTACT:** Vernon Gee 427-1524
	CSB Employee Calendar Program	Transportation/Utilities	To produce a plot of employee versus days of any specified month. **CONTACT:** Don McTavish 427-8690
	Departmental Organizational Charts	Education	Produces organizational charts of Department or Branches. Uses ORG-PLUS ADVANCED, interfacing with dBase files and data downloaded from APIX. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** Brad Vergo 427-2058
	Educational Leave and Incentives	Health	This system is used by the Human Resource Services Division to track educational leave and incentives for Alberta Health employees. **CONTACT:** Vernon Gee 427-1524
	Employee Accident System	Transportation/Utilities	The system produces various reports containing on-the-job accidents statistics. Both general and special reports are generated. **CONTACT:** Don McTavish 427-8690
	Employee Activity Analysis - Elevator Branch	Labour	The accumulation and reporting of the time expended on a monthly and year-to-date basis of all activities undertaken by employees of the Elevator Branch. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Employee Activity Analysis - Electrical	Labour	To provide rapid retrieval of information that is required by individual inspectors, regional office supervisors and branch managers in setting and meeting branch priorities and objectives. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Employee and Position Reporting	Education	Provides reporting of Employee data (from data downloaded from APIX). Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
	Employee Attendance System	Health	A PC based system which records the employees' absences from the Monthly Time Sheet and maintains the employees' entitlement balances. **CONTACT:** Terry Oakes 422-9449

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Human Resources	Employee Data Base	AADAC	This data base contains information on salaried employees relating to disability premiums, dental plan & VRDP cost sharing. (Computer Sciences Canada) **CONTACT:** Vince Pallier, Senior Accountant
	Employment Standards Umpire Awards Index	Labour	To record, maintain, and provide access points into written grievance arbitration awards relating to the Employment Standards Act. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Engineer Exams	Labour	Microcomputer data storage and retrieval system for all levels of power engineers and pressure welders. This system greatly improves the processing of applications, examination and certification of power engineers and pressure welders formerly performed manually. The extraction of statistical data for Annual reports or at the request of private industry is now possible. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Fire Training Examinations	Labour	This is a microcomputer application which is used to capture and display levels of certification for individuals enrolled in the program. Dates and results achieved are recorded as to the intermediate steps required to meet each level of certification. These can then be displayed or printed and issued as a student record verification. **CONTACT:** B. Litwin, Systems Branch 427-9048
	Firefighters Certification System	Energy/Forestry	A batch registry system which identifies all certified fire fighters in the province. The purpose of this system is to provide information to all the forests on available firefighting skills. **CONTACT:** Keith Peters 427-6810
	Forestry Personnel Management	Energy/Forestry	To store and maintain personnel information for all of the permanent, project and long term wage staff employed by the AFS. (Micro) **CONTACT:** S. McLachlin 422-5224
	Grievance Arbitration Awards Index	Labour	A batch system for gathering, updating and reporting of all grievance arbitration awards occurring under the provisions of the Labour Relations Act. **CONTACT:** J. Stocco, Systems Branch 427-9048

Human Resource.	Health Manpower Planning System	Solicitor General	This is a micro based system application used to support the planning for health professionals in the province of Alberta. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427–0366
	Health Registration Tracking System	Solicitor General	This is a micro based application running on a Novell LAN. This system supports the registration of various professions and occupations which are not being registered by their associations. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427–0366
	Health Screening/Medical Examination (EARS)	Personnel Admin.	Processes information on hearing tests provided to noise–exposed employees at various worksites. **COMMERCIALIZATION STATUS:** Not available. Medically confidential. **CONTACT:** S. Mandryk 427–4416
	Human Resource Management Report	Education	To maintain information on personnel in each branch, including number of staff, status of positions, position classifications, man–years consumed, etc. Produces monthly reports. Uses dBase IV. **CONTACT:** Brad Vergo 427–2058
	Human Resources Information	ERCB	Personnel records; including personal, benefits and payroll information. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Human Resources Inventory	Energy/Forestry	Micro based system for training and career growth. **CONTACT:** Carol Sherwin 427–6768
	Human Rights Education Information	Labour	Captures and provides monthly and year to date statistics with respect to educational activities undertaken by Commission and staff members. The system provides information as to types of activities, groups addressed, information disseminated and the number of individuals attending. **CONTACT:** J. Stocco, Systems Branch 427–9048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Human Resources	Human Rights Index	Labour	Organizes and provides access to unreported human rights decisions. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Interest Arbitration Awards Index	Labour	To record, maintain and provide various access points into Alberta precedents relating to Arbitration Awards. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Management Information	Labour	The Management Data Base is a management resource inventory based on education, experience, training and development and career goals. This micro system also captures, maintains, inquires and reports on overtime information for all employees in the department. Also provides access to the government wide PIAS developed through PAO to report on information downloaded from the APIX system. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Management Pay System	Health	This system captures information on managment personnel extracted from PIAS system which is maintained by PWSS. The system provides a tool for report generation on different scenerios of management pay increases as per performance levels and Treasury Guidelines. **CONTACT:** Terry Oakes 422-9449
	Management Performance Appraisal System	Education	Tracks performance appraisals for managers, assists in calculating merit increases and maintains a history of ratings. Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
	Occupational Health and Safety Micro System	Energy/Forestry	Micro system for recording occupational health and safety statistics. **CONTACT:** S. Brown 427-6768
	Overtime Summary	Treasury	A microcomputer system based on Symphony. To keep track of the outstanding overtime reported by staff. **CONTACT:** J. Parton 427-9416
	PC – Personnel Information Access System	PWSS	Database containing personnel information, used for reports and extracts. A microcomputer PC-FOCUS (4GL) application. Menu driven. **CONTACT:** Personnel Division, Divisional Support 427-4359

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Human Resources	Personnel Development Tracking System	Consumer & Corp Affairs	DBase III System developed on Compaq. Used to track and control all education courses that department employees are enrolled in. Also provides cost accounting data. **CONTACT:** Ed Rogusky, Human Resources
	Personnel Employee Training System (PETS)	Recreation and Parks	Keeps track of all course offerings and the employees that have taken courses plus all employees that are registered for courses in the future. **CONTACT:** Head, Staff Development Section 427-2690
	Personnel Information Access System (PIAS)	Health	This system is a central system operated by PAO in conjunction with PWSS. Personnel information from APIX is down loaded into a departmental FOCUS database. On-line access to request batch reports and/or ad hoc reports. **CONTACT:** Brent Sorken 427-1466
	Personnel Information System	Municipal Affairs	Provides information on employee status. **CONTACT:** Lloyd Livingstone 427-4868
	Personnel Inventory and Management System	Solicitor General	To provide the Personnel Division with the capability to monitor and track the recruitment process, a profile of each employee, a position tracking sub-system, a complete staff development history and record keeping function for employee relation activities. This system has been recently enhanced to include wage employee information. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427-0366
	Personnel Wages Information System	Family & Social Services	This system provides on-line access for both inquiry and adhoc reporting of payroll and personnel related information on all departmental wage positions. **CONTACT:** Niall Lynch 441-6711
	Preventive Mediation	Labour	To collect and report data relating to Branch Preventative Mediation activities. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Problem Log Systems	PWSS	To record Systems Section's user problems and response. Functions also include reporting. (Micro) **CONTACT:** Management Services Branch, Systems Section 427-2222

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Human Resources	Property Management Manpower System (PMMS)	PWSS	Keeps Property Management personnel information including supervisors and building in which the employee works. (Micro based) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Retirement Benefits	Treasury	Provides automated support in the pension system for calculating retirement benefits including eligibility, application, service and salary certification, pension option choices and actual payment production. **CONTACT:** D. Ross 427-2782
	Staff Development	Family & Social Services	This system records and reports on staff training and development activities for all employees within the department. **CONTACT:** Niall Lynch 441-6711
	Training Administration & Delivery System	PWSS	Software package to administer internal training functions. Interactive training function (ASI). **CONTACT:** Management Services Branch, Systems Section 427-2222
	Training Database	Education	Tracks courses, training and cost. Interfaces with APIX. Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
	Vacancy Reporting	Education	Maintains information and produces reports on vacant positions by Branch within the Department. Interfaces with APIX. Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
	Wage Processing	Culture	To report on wage personnel and to which section they are charged. (MARK IV) **CONTACT:** Chi Loo, Financial Services 427-9898
	Wage Tracking	Education	Maintains information on wage employees. Interfaces with APIX. Uses dBase IV. **CONTACT:** Brad Vergo 427-2058
Inventory/Asset Control	Aerial Photograph Inventory System	Transportation/Utilities	The system inventories aerial photographs and related information. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Aggregate Source Inventory	Transportation/Utilities	This system keeps an inventory of provincial aggregate sources and produces eight different reports using different sort criteria. CONTACT: Don McTavish 427-8690
	Aircraft Flight Inventory	Energy/Forestry	Micro system to maintain a record of all aircraft used within the Department of Forestry, Lands and Wildlife for both fire related and non-fire related uses. CONTACT: Keith Peters 427-6810
	Asset Control System	Recreation and Parks	Inventory of fixed assets by category and location. Data entry is now available on-line using RPF on ROSCOE. CONTACT: Director, Financial Services Branch 427-2901
	Asset Information Management System (AIMS)	Family & Social Services	This microcomputer system captures and reports information about the fixed assets of the department. CONTACT: Andrew Pietruch 441-6711
	Asset Inventory System (ASSETS)	Recreation and Parks	System to record, track and report on fixed assets, including furniture and attractive items under control of the Community Recreation Branch. CONTACT: Director, Community Recreation Branch 427-2011
	Bareroot System	Energy/Forestry	To assist in the management and control of the bareroot seedling production at the Pine Ridge Nursery. Bareroot seedlings are seedlings grown in prepared fields as opposed to containers. (Micro) CONTACT: Lindsay Kerkoff 427-8474
	Basis System Catalogue	Transportation/Utilities	This is a multi-user system that provides information pertaining to a particular system in the department. Through a variety of on-line queries, data can be stored and manipulated interactively. Reports, such as the System Summary Sheets and the catalogue of Production Systems are also generated by this system. CONTACT: Andrew Brown 427-8690
	Bench Marks System	Transportation/Utilities	The system inventories survey bench mark locations in Alberta. CONTACT: Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Bridge Drawing Index System	Transportation/Utilities	This system keeps an index (inventory) of bridge drawings kept by Bridge Branch. It uses the Bridge Information System master file. **CONTACT:** Don McTavish 427-8690
	Bridge Information System	Transportation/Utilities	A system to manage inventory data for bridges in Alberta. **CONTACT:** Don McTavish 427-8690
	Bridge Services Salvage Reports	Transportation/Utilities	This system keeps track of the status of culvert and precast salvage items. **CONTACT:** Don McTavish 427-8690
	Campground & Maintenance Garage Info System	Transportation/Utilities	This system will provide a procedure for the management, sorting, and searching of maintenance garages and campsites facilities files. **CONTACT:** Don McTavish 427-8690
	Cattle & Horse Brand Registry	Agriculture	Maintenance of all current registered brands and owners. **CONTACT:** A. Nelson 427-2101
	Cattle Brand System	Agriculture	Cattle sales information retrieval. **CONTACT:** A. Nelson 427-2101
	Central Vehicles System	Agriculture	A system that monitors the expenditures of supplies for vehicles used by Alberta Agriculture staff. **CONTACT:** Sharon Watters 427-2101
	Certificate and Licencing Control (CLC)	Energy/Forestry	Provides yearly statistics and analysis of hunting trends, special requests for information on hunters, wildlife certificates and licences, sampling frame for mailing out questionnaires. **CONTACT:** C. Trowsdale 427-6729
	Contractor Data Base	PWSS	Records contractors who have been invited to bid on jobs managed by PWSS. Used as a means to determine fair and equitable distribution of work to qualified firms. (Micro based) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Department Telephone Directory	Transportation/Utilities	It produces the Alberta Transportation Departmental Telephone Directory using SCRIPT/VS. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Departmental Fixed Assets Inventory (DINV)	Environment	Inventory of departmental fixed assets. **CONTACT:** Salim Hirji 427–8869
	Departmental Parking System	PWSS	A PC system which keeps an inventory of all the parking stalls assigned to PWSS. **CONTACT:** Management Services Branch, General Services Manager 427–2222
	Drawing Index (DI)	PWSS	Inventory of floor plans in buildings owned/leased by PWSS. (Micro based) **CONTACT:** Management Services Branch, Systems Section 427–2222
	EDP Inventory System	Transportation/Utilities	This is a mainframe application developed in FOCUS which provides the information services branch with a fixed asset control system for all data processing assets. **CONTACT:** Andrew Brown 427–8690
	Elevator Inspection System	Labour	A batch registry system for all inspectable elevators within the Province of Alberta. Micro System. **CONTACT:** J. Stocco, Systems Branch 427–9048
	Equipment Inventory	Consumer & Corp Affairs	DBase II system on Victor 9000 used by systems and others to track equipment locations. Also monitors software. **CONTACT:** Don Coley
	Equipment Records System	U of A Hospitals	Recording of all equipment, including furnishings within the hospital. Includes location, owner department, costs, manufacturing information, etc. Provisions for preventive maintenance scheduling and maintenance costs have been made for future extensions. **CONTACT:** Director, Information Systems 492–6937
	Facility Evaluation System (FES)	PWSS	Records evaluation requests of physical condition of facilties. (Micro based) **CONTACT:** Management Services Branch, Systems Section 427–2222
	File Charge Out System (FCOS)	Treasury	To allow users of corporate case files to request copies of files through on–line terminals. The files charged out are kept track of by the system until they are returned. Also provides monitoring capabilities for incoming correspondence. **CONTACT:** J. Parton 427–9416

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Firmware Inventory Tracking System	Solicitor General	This mainframe computer system is designed to assist in maintaining an accurate and up–to–date inventory of all software and hardware owned by the department. It also allows receiving reports on problems associated with each hardware item. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427–0366
	Fixed Asset Control System	Energy/Forestry	Keeps track of all inventory assets and reports them monthly and annually. **CONTACT:** D. Devine 422–1711
	Fixed Asset Inventory System (FIX)	Culture	To assist in the surveillance of furnishings and equipment owned by or on loan to Alberta Culture. (VS – COBOL) **CONTACT:** Erwin Benke, Financial Services 427–5156
	Fixed Asset System	Advanced Education	To provide financial control for fixed assets over $500 purchased by the provincially administered institutions. Developed on PowerHouse PC. **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** S. Rajwani 427–7147
	Fixed Assets	Alta Mortgage & House (Municipal Affairs)	To track the status for all Alberta Mortgage & Housing Corporation Fixed Assets. (VAX 11/780/8600 Cluster) **CONTACT:** Information Systems Branch 427–4867
	Fixed Assets	Health	This system records and reports transactions that effect a Fixed Asset such as purchases, acquisitions, surpluses, loss or destruction. **CONTACT:** Terry Oakes 422–9449
	Fixed Assets Control System (FACS)	PWSS	Microcomputer based, provides information on all fixed assets in the Revolving Fund. Calculates depreciation each month and gain/loss on disposals. A similar system is used by the rest of the Department. **CONTACT:** Application Services Branch 427–4181
	Fixed Assets Inventory	Education	Inventory control of all fixed assets in Alberta Education. Uses dBase III. **CONTACT:** Cheryl Donnachie 427–2051

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Fixed Assets Inventory	Municipal Affairs	Maintains an inventory of the Department's Fixed Assets. **CONTACT:** Lloyd Livingstone 427–4868
	Forestry Mechanical System	Energy/Forestry	To keep track of maintenance and operating costs for vehicles and other machinery equipment owned, leased or rented by the AFS. (Micro) **CONTACT:** Sharon Ruta 427–6822
	Forms and Illustrative Materials (FIMS)	Energy/Forestry	A micro based inventory control system that processes requests for forms and other paper materials along with minor accounting functions. **CONTACT:** D. Davies 422–4269
	Forms Inventory and Control (FICS)	Treasury	To keep track of the inventory of CTA forms and their usage level. To produce re–order reports when inventory level is low and to handle bulk mailing of forms to Tax practitioners and Accounting firms. **CONTACT:** J. Parton 427–9416
	Fur Affidavits System	Energy/Forestry	Mainframe system which retains a file of all affidavits filed by registered fur trappers. The information base runs from 1970 to 1984. Subsequent documents not yet captured because production was suspended. **CONTACT:** C. Trowsdale 427–6729
	Headworks Plan Retrieval System (HWPI)	Environment	Indexing system for locating hundreds of engineering and structural drawings for irrigation headwork structures. **CONTACT:** Bob Curtis 181–5974 (RITE)
	Highway Control Section Breakdown	Transportation/Utilities	This program inventories control sections on primary highways. For each control section it outputs road mileage, stations, and chainage in kilometers at even mileage. **CONTACT:** Don McTavish 427–8690
	Highway Design Plan Index System	Transportation/Utilities	This system inventories highway design plans. It reports on all plans associated with each highway. **CONTACT:** Don McTavish 427–8690
	Highway Inventory for RTS	Transportation/Utilities	To maintain an inventory of approach and park roads. **CONTACT:** Don McTavish 427–8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Highway Inventory System	Transportation/Utilities	Release 1.1 implemented. Basic inventory of primary and secondary highways in the province. Not all data available yet. Allows basic input/edit/update of road names, classes and surveyed positions. **CONTACT:** Don McTavish 427-8690
	Highway Surface Type Classification & Mileage	Transportation/Utilities	This system reports surface types of all primary highways. Each control section is divided into base and surface type. Each base and surface type is further divided and their lengths totalled. **CONTACT:** Don McTavish 427-8690
	Index to the (Alberta) Premiers' Papers	Culture	Maintains a listing of indexes to the Alberta Premiers' Papers from 1922- 1955 (59). The primary aim is to provide the listing for public usage. **CONTACT:** Brian Speirs
	Indexed Central Records	Labour	To provide a fast, accurate method of accessing all records stored within the Central Records files. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Insurance Inventory System	PWSS	The system was developed to record the PWSS insurance inventories and to allow data entry and reporting to be done more efficiently. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Inventory/Asset Control	AADAC	Based on dBase IV, this system has been programmed to manage inventory of AADAC's print materials. It also manages invoicing of materials sold. **CONTACT:** Grace Whitehouse 427-7319
	Inventory Control	Municipal Affairs	Inventory Control - Spreadsheets, Word Processing. IBM/XT. **CONTACT:** Jeff Jewel 427-4868
	Inventory Control (IC)	Culture	To assis: in maintaining the inventory of supplies for SAJA, NAJA and PM&A. (ACCPAC) **CONTACT:** Aziz Alidina, Revolving Fund 427-2715
	Inventory Control System	Labour	Records and reports all departmental fixed assets and furniture holdings. **CONTACT:** A. Munchau, Systems Branch 427-9048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Inventory Management System (IMS)	Energy/Forestry	A micro based system designed to facilitate effective control and monitor movement of all Alberta Forest Service warehouse goods across the province. **CONTACT:** Ed Johnson 427-6836
	Inventory System	Career Dev & Employment	Minicomputer Application. Tracks the assets of the Department from time of acquisition through to ultimate disposal. This includes furniture and various types of equipment, including EDP fixed assets. **CONTACT:** Milli Sadlowski, Facilities Management 422-4489
	Licencing Information System (LICS)	Environment	Inventory system of allowable contaminant emissions to the atmosphere. **CONTACT:** Dennis Eriksen 427-5883
	Loan Management System (LOAN)	Culture	To assist the scientists and curators at the museums operated by Alberta Culture with information on items that have been loaned out or are on loan. Subset of the Museum Collection Management System. (CYBER - BASIS) **CONTACT:** Jackie Wilkie, Collections, Tyrrell Museum. 823-7707 RITE - 164-1271
	Mainframe Equipment System (TERMINAL)	Recreation and Parks	Keeps an inventory of all mainframe peripheral devices within the Department. **CONTACT:** Director, Information Services Branch 427-2911
	MDMRS Inventory System	PWSS	This system helps manage the inventory of radio equipment used for MDMRS. It runs on a service bureau using a VAX platform. **CONTACT:** Network Management Branch, Radio Systems Manager 427-0896
	Micro Inventory System (MICRO)	Recreation and Parks	Keeps track of all microcomputer equipment, peripherals and cost. **CONTACT:** Director, Information Services Branch 427-2911
	Microcomputer Inventory System	PWSS	A PC system to track microcomputers and related components used in PWSS. The XDA package uses SQL for queries on specified data. **CONTACT:** Management Services Branch, Systems Section 427-9009

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Mobile Highway Inventory System	Transportation/Utilities	This is an on-line system which produces summaries and reports of data collected by the Branch. This data includes sign and physical inventories for highways and secondary routes in Alberta. **CONTACT:** Don McTavish 427-8690
	Museum Collection Management System	Culture	Collection system to assist the scientists and curators at museums operated by Alberta Culture. Cyber system at U of A. **CONTACT:** Jack Edwards
	Nursery Information Management System	Energy/Forestry	To assist in the management and control of all functions at the Pine Ridge Nursery. These include a) seed extraction, cleaning and storage, b) container seedling production, c) bareroot seedling production, d) quality control, and e) genetics and tree improvement. **CONTACT:** Lindsay Kerkoff 427-8474
	Office Equipment System (OES)	Recreation and Parks	Keeps an inventory of all word processing equipment within the Department. **CONTACT:** Director, Information Services Branch 427-2911
	Original Drawing Index System	PWSS	Maintains and reports on an Inventory of Architect's Drawings for Buildings Constructed by Public Works. (Micro based) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Parking System	PWSS	Keeps track of parking stall allocations, fees, leases and departments for the Government of Alberta. Reporting included. (Micro) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Parts and Materials Inventory System	Transportation/Utilities	This large batch system provides management information on the financial status of all Parts and Materials Inventory held in the various stores depots (28) throughout the Province. It provides standard inventory control information such as economic order quantities, demand histories, purchasing and stock status, vendor information, etc. **CONTACT:** Don McTavish 427-8690
	Personnel Records System	PWSS	Tracks the location of stored records relating to ex-employees of the Provincial Government and brings forward those records due for disposal or final archiving. **CONTACT:** Management Services Branch, Systems Section 427-2222

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Pesticide Permitting	Environment	Maintains an inventory of all permits relating to the application of pesticides in environmentally sensitive areas within Alberta. **CONTACT:** Neil Wandler 427-5855
	Primary Highway Lighting System	Transportation/Utilities	This system stores information on highway lighting locations and types of lights used at each location. **CONTACT:** Don McTavish 427-8690
	Private Radio Inventory System	PWSS	This system helps manage the inventory of private radio systems. It runs on a service bureau using a VAX platform. **CONTACT:** Network Management Branch, Radio Systems Manager 427-0896
	Purchasing Information System	Family & Social Services	This is a microcomputer system which captures and tracks Purchase Order information to assist in the monitoring of the processing and status of orders. **CONTACT:** Andrew Pietruch 441-6711
	Recreation Area Facility Inventory System	Recreation and Parks	The system includes inventory of facilities and natural resources. **CONTACT:** Admin. & Technical Support Branch 427-4666
	Recreation Area Inventory	Energy/Forestry	Mainframe system which maintains information on facility inventory in each recreation area. **CONTACT:** Norm Rodseth 427-3582
	School Bus Inspection System	Transportation/Utilities	This system keeps track of information concerning school bus inspections, certificates, vehicle inspection stations and mechanics. **CONTACT:** Don McTavish 427-8690
	Seal Coat Inventory System	Transportation/Utilities	This system manages information on seal coat projects such as costs, type of emulsion, types of chips and the amounts of chips and emulsion used for each project. **CONTACT:** Don McTavish 427-8690
	Secondary Roads Inventory System	Transportation/Utilities	The system maintains an inventory of all secondary roads in the province. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Sheet Music Inventory	Culture	Sheet Music held in the Departmental Library Branch is recorded for inventory purposes and listings are distributed to regional representatives to make sheet music available to the people of Alberta. **CONTACT:** Paula O'Donnell
	Silviculture and Cut Block Control	Energy/Forestry	A micro-based inventory based on cut blocks providing information on treatment and regeneration. Also maintains certification information for provincial regeneration surveyors. Maintains records identifying agency responsible for reforestation. **CONTACT:** L. Kirkhoff 427-8474
	Space Planning System (SPS)	PWSS	Inventory of Space owned or leased by PWSS. (Micro based) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Steel Plan Index System (Bridges)	Transportation/Utilities	This system manages the information associated with steel truss bridges which can be salvaged and moved to a new location in the province where needed. Location, modifications, and salvage status are stored. It accesses the Bridge Information master files. **CONTACT:** Don McTavish 427-8690
	Stock Advance System	Municipal Affairs	A system to produce reports showing the monthly activity of the Department's stock advance office. **CONTACT:** Lloyd Livingstone 427-4868
	Supply Inventory Management System (SIMS)	PWSS	Maintains a file of all Warehousing and Distribution inventory items. Statistical analysis on inventory items and usage. Produces an inventory catalogue for use by all government departments. Interfaces with DBS. **CONTACT:** Warehousing and Distribution Branch, Director 427-3008
	Survey Equipment Inventory System	Transportation/Utilities	This system maintains a record of survey equipment used by the Transportation Department throughout the province. The system will provide data necessary for the determination to where equipment needs to be sent, and what new equipment needs to be purchased. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	System Inventory System (SYST)	Culture	To assist in keeping track of all of the computer equipment purchased, which branch owns it, where it is located, price, what it is connected to and what is connected to it. (CYBER - BASIS) **CONTACT:** Connie Thompson, Systems 427-2397
	Telecom. Equipment Management System (TEMS)	PWSS	Track Telecommunication equipment orders and installations. It runs on a service bureau using a VAX platform. **CONTACT:** Telecommunications, Operations & Admin. 427-4375
	Testing Equipment Inventory	Transportation/Utilities	This system is used by the Transportation Lab to track information on the inventory of supplies, purchasing of materials, and material usage. **CONTACT:** Don McTavish 427-8690
	Truck Registration System	Transportation/Utilities	This system is used to keep track of truck registration processing forms used for the Winter Stockpiling program. The system provides information on all trucks registered resulting in an increased level of service and effectiveness in truck dispatching. **CONTACT:** Don McTavish 427-8690
	User Call Log System (CALLLOG)	Culture	To assist in the surveillance of time spent on calls by users for support. To tell which are as require the most support and which problems are recurring. (FOXBASE) **CONTACT:** Cindy Thiel, Systems 427-2397
	Vehicle Expenditure Processing System (VEPS)	Energy/Forestry	To record and process vehicle maintenance and fuel vouchers for Forestry and Public Lands vehicles. **CONTACT:** Jan Patterson 427-5255
	Vehicle Inventory Management System	Culture	To assist in monitoring the conditions and location of the vehicles owned by or on loan to Alberta Culture. (FOXBASE) **CONTACT:** Erwin Benke, Financial Services 427-5156
	Vehicle Inventory Management Sys. (VIMS)	PWSS	This system records the inventory status of all CVS owned vehicles and equipment and provides billing information to DBS. **CONTACT:** Equipment, Courier & Surplus Branch, Director 427-3766

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Inventory/Asset Control	Vehicle Inventory Management System (VIMS)	Recreation and Parks	Tracks all vehicles currently in use by the Department. **CONTACT:** Section Head, Equipment & Materials 427-2968
	Visual Arts and Crafts Inventory	Culture	To assist in closer surveillance of arts and crafts collection held by Visual Arts Branch for the purposes of displaying in various Government Buildings in Alberta, in other provinces and in other countries. **CONTACT:** Betty Rothwell
	Weather Reporting System	Energy/Forestry	A batch inventory of Alberta Forest Service and Federal weather data from 1958 for use in protection of Alberta's forests. Interfaces with Weather & Storm Statistical Analysis. **CONTACT:** Ben Janz 427-6810
	Word Processing Index	Labour	Provides for the control and location of information placed on Micom Word Processing disks. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Workplace Hazardous Materials Information System	PWSS	Keeps track of WHMIS information for PWSS. Includes reporting. (Micro) **CONTACT:** Personnel Division, Divisional Support 427-4359
Justice	Adult COMIS Case Tracking System	Solicitor General	The system includes on-line booking, movement and temporary absence records for Detention, Remand and sentenced inmates within all Alberta Correctional Institutions. The system is an aid to Institutional Operations, produces operational reports, monitors the Exchange of Service Agreement with the federal agencies. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427-0366
	Civil and Sheriff Entry System (CASES)	Attorney General	To support the processing, filing and retrieval, and indexing of documents in the Court of Queen's Beach for civil cases and the office administration of the Sheriff's Office in Edmonton and Calgary. Minicomputer based (IBM S/38). **CONTACT:** Briand McInnes 427-4992
	Computer Aided Transcription (CAT)	Attorney General	A BARON DATA automated system to assist court reporters in the transcription of system type notes in Court of Queen's Bench or in Provincial Court(s). **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** Briand McInnes 427-4992

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Justice	Court Automation Project (CAP)	Attorney General	To support the administrative functions within Court Services, to assist in the processing of Specified Penalty Voluntary Payment (traffic tickets) and Criminal Case Tracking. Interfaces with COMIS, MOVES and CJIS. Mainframe based using SUPRA. **CONTACT:** Briand McInnes 427-4992
	Criminal Justice Information System (CJIS)	Attorney General	To provide case management and decision support capabilities to assist in the administration of justice in the criminal courts. Mainframe based using IDMS. **CONTACT:** Bob Butlin 427-5042
	Enforcement and Prosecution PRO/FEWS	Energy/Forestry	Provides a data base for all prosecutions for Fish & Wildlife offenses on a yearly basis. Provides a list of convicted individuals who are therefore not allowed certain freedoms in the following hunting season. Statistical analysis conducted at year's end. Warnings are retained by the FEWS system. **CONTACT:** R. Adams 427-8205
	Legislative Counsel System	Attorney General	To provide fast turnaround and high quality products for legislation, regulations, orders-in-council, consolidation of statutes and regulations; network access to the search Database which contains Alberta Statutes and Regulations for drafting and research purposes. EDP support is BASIS and APWSS' mainframes; in house IBM 5520's and laser printers. **CONTACT:** Daphne Hall 427-2217
	LEMIS	Solicitor General	Captures and collates Crime Statistics from R.C.M.P. and Municipal Police Units. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427-0366
	Maintenance Enforcement Tracking System (METS)	Attorney General	A mainframe IDMS system which registers any agreements for enforcement and collection of monies owing to creditors. **CONTACT:** Gerald Leibel 422-5554

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Justice	Management Information System	Solicitor General	This system extracts information from COMIS on a monthly basis on offenders, their cases, their charges, their movements, etc. to establish a set of SAS research files. This information is then supplemented with manual aggregate data to create additional research files. These files are then used by Corrections researchers to respond to managment requests for information on the Corrections operation. As well, quarterly, the files are used to generate a series of reports/graphs for executives. **COMMERCIALIZATION STATUS:** Available subject to agreement by developing agencies. **CONTACT:** Mansoor Derakhshan 427-0366
	Municipal Police System	Solicitor General	This micro application supports the day-to-day operations of a small Municipal Police Unit. It captures UCR and activity information at the Police Unit level and produces an interface tape that feeds into the Law Enforcement Management Information System (LEMIS). **COMMERCIALIZATION STATUS:** Available subject to agreement by developing agencies. **CONTACT:** Mansoor Derakhshan 427-0366
	Young Offender Case Tracking	Solicitor General	Facilitates the record keeping of Young Offenders in Detention facilities. Information maintained for each case includes admission, classification, movement, temporary release, assessment, charge and incarceration details. Interfaces with the Young Offender Community Corrections System. It also assists in monitoring of the cost sharing agreement with the federal agencies. **COMMERCIALIZATION STATUS:** Available subject to agreement by developing agencies. **CONTACT:** Mansoor Derakhshan 427-0366
	Young Offender Community Correction System	Solicitor General	Maintain a record of Young Offender Community Supervision cases. Information maintained for each case includes intake, charge, program summary, investigative report and case transfer details. Interfaces with the Young Offender Case Tracking System. **COMMERCIALIZATION STATUS:** Available subject to agreement by developing agencies. **CONTACT:** Mansoor Derakhshan 427-0366
Land	Alberta Land Titles Automation System (ALTA)	Attorney General	A system providing the record of ownership of protected land in Alberta. Included is the ability to register documents against the title, transfer property and search on various parameters. The system is an on-line IDMS mainframe application with an optical scanning conversion front end. **CONTACT:** Ari Van Os 427-5166

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Land	Alberta Survey Control System	Energy/Forestry	To facilitate the management, processing, reproducing and publishing of survey control data. CONTACT: C. Barnes 427-3138
	Alta Forest Inventory Storage & Maintenance	Energy/Forestry	To capture, maintain and report information on the land cover within Forest Management Units. Interfaces with TIMPLAN, T-PLOT Analysis. CONTACT: Daryl Price 427-8401
	Alta. Land Use Planning Data Bank Info Retrieval	Municipal Affairs	A land use planning tool for Provincial Planning Agencies. CONTACT: Lloyd Livingstone 427-4868
	Cemetery Reporting System	Consumer & Corp Affairs	Clipper system for keeping track of the registered cemeteries in the province and for inquiring on the names/location of cemeteries. Produces a wide variety of reports. CONTACT: Helen Hanson, Licensing
	Common System (CS)	PWSS	Maintains unique identification and relevant information about buildings, sites, parking lots owned and leased by PWSS. (Micro based) CONTACT: Management Services Branch, Systems Section 427-2222
	Environment Land Management System (ELMS)	Environment	A database application/repository of Alberta Environment owned land as well as dispositions, reservations and land use agreements. CONTACT: Ken Nelson 427-6162
	Foreign Ownership Companies Information System	Energy/Forestry	The Micro system was developed to provide the Foreign Ownership of Land Administration with information about all corporations owning controlled land in order to assist them on investigations of the eligibility of corporation and/or shareholders. CONTACT: B. Sauvegret 427-6584
	General Register Sub-system	Attorney General	The General Register sub-system is a large operational name file containing details on executions and judgements registered against individuals and companies. The registration teams must search the file for judgements against property owners before a disposition of land (or interest in land) can be processed. The general public can also request a search of the name file. This sub-system is presently automated as an independent application using VAX computers. CONTACT: Ari Van Os 427-5166

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Land	Land Acquisition Reporting System (LARS)	PWSS	Tracks expenditures and documentation through the land acquisitions process for Government projects. (Micro based) CONTACT: Management Services Branch, Systems Section 427-2222
	Land and Building Inventory System	Alta Mortgage & House (Municipal Affairs)	To provide the Alberta Mortgage & Housing Corporation with a Land and Building registry of those assets in which the Corporation has an interest. (VAX 11/780/8600 Cluster) CONTACT: Information Systems Branch 427-4867
	Land Inventory System	Transportation/Utilities	This system is a computerized inventory of parcels of land owned by the department but leased to Albertans. CONTACT: Don McTavish 427-8690
	Land Management System (LMS)	PWSS	Planning and management system for land acquired and held by PWSS. (Micro based) CONTACT: Management Services Branch, Systems Section 427-2222
	Land Reclamation Information System	Environment	Database system consisting of land reclamation information. CONTACT: Lawrence Kryviak 427-4147
	Land Registry System	Recreation and Parks	Concerns the registration and disposition of crown lands of interest to the department. Monitors the status of permits and leases on lands. CONTACT: Management Support Branch 427-8758
	Land Status Automated System	Energy/Forestry	LSAS system is an IDMS system used to access current surface and sub-surface information on crown lands. CONTACT: L. Barry 422-5727
	Land Survey Coordinate Record System	Energy/Forestry	To compute and maintain geographic positions for Land Survey monuments in the province of Alberta. CONTACT: Curt Romaniuk 427-3143
	Land Survey Document System	Energy/Forestry	To provide the Land Survey Branch with mechanisms to track and maintain all current and historical plans of surveys which are dealt with by the Director of Surveys office. CONTACT: Michel Cote 427-3143

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Land	Land Titles Changes	Municipal Affairs	To provide quarterly listings of all land title transfers within the province. CONTACT: Lloyd Livingstone 427-4868
	Lease Inventory System	PWSS	Inventory of leases administered by PWSS. CONTACT: Management Services Branch, Systems Section 427-2222
	Loans Approval System	Transportation/Utilities	System provides electric service line information to Rural Electric Services Section to assist in approval of loan applications for installation of single-phase and three-phase electrical services. CONTACT: Bob Ferguson 427-8690
	Location - Electoral System	PWSS	A table system which provides locations linked to Electoral Districts and Municipal boundaries. (Micro based) CONTACT: Management Services Branch, Systems Section 427-2222
	Natural Areas Map Supplement	Energy/Forestry	A micro based system that monitors information pertaining to the Natural Areas found in Alberta. CONTACT: P. Lee 427-5209
	Oil and Gas Agreements Sales and Administration	Energy/Forestry	Provides support for Oil and Gas Agreement Sales with pre-sale and post-sale reporting components. Micro based system. CONTACT: Eugene Saldanha, Agreements Admin. 427-7749
	Photogrammetic Control & Air Photo System	Energy/Forestry	To store and retrieve photogrammetric control material/data and air photo project information. Also, to provide this information to users interactively or on printouts. CONTACT: Michel Cote 427-3143
	Range	Energy/Forestry	To assist in managing and administering range lands within the province to ensure that maximum productivity is achieved from these lands. (Micro) CONTACT: Murray Anderson 427-3588
	Rare Plants	Energy/Forestry	A micro based system that provides information on rare plants found in Alberta. CONTACT: P. Lee 427-5209

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Land	Roadside Development File Index	Transportation/Utilities	This micro based system is used to maintain an index for roadside development, subdivisions and utilities files. CONTACT: Don McTavish 427-8690
	Sand and Gravel Information System	Environment	Database system for maintaining records of sand and gravel operations and other surface disturbances throughout the province. CONTACT: D. Bratton 427-6322
	Soils Info. Database for Management & Planning	Agriculture	SIDMAP system maintains soils inventory for province at quarter-section, section and quarter township levels. Soil type, municipality, climate zone, CLI value, soil parent material, particle size, etc. CONTACT: Keith Toogood 427-2101
	Wellsite Information System	Environment	Database system for maintaining records and issuing certificates and orders for oil and gas wellsite operations. CONTACT: Susan Slipec 427-6212
Library Management	Articles Inventory	Health	A PC based system that stores data about articles on AIDS and Dental Health. CONTACT: Terry Oakes 422-9449
	Automated Library Catalogue	ED&T	An automated card catalogue of publications in the Department libraries with on-line access capabilities. CONTACT: Donna Gordon 427-0675
	Automated Library Catalogue System	PWSS	Microcomputer based package to support general library functions. CONTACT: Management Services Branch, Systems Section 427-2222
	Bibliographic Retrieval Services (BIRS)	Environment	A bibliographic information retrieval system on information sources of books/articles not found in Alberta Environment library. CONTACT: Deb Fralick 427-7849
	Book Acquisition	Health	A PC based system that controls the process of ordering books, audio visual materials and periodicals. The system will generate purchase orders and update the libraries' budget. CONTACT: Terry Oakes 422-9449

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Library Management	Columbia Library System	Health	A PC based system which maintains a catalogue of the library's holdings. **CONTACT:** Terry Oakes 422-9449
	Document Indexing System (DOIS)	Treasury	To automatically build up an index of documents stored in files. The index can be used for searching through on-line terminals so that documents meeting the search criteria can be quickly identified. **CONTACT:** J. Parton 427-9416
	Forest Ecology	Energy/Forestry	To serve as the databank for the site classification information collected from the various forests. The information is analyzed to assist in the management of the forest resources. (Micro) **CONTACT:** Oleska Bakowsky 422-1038
	Forestry Youth KWOC	Energy/Forestry	Mainframe system for Forestry which provides utilization of a keyword out of context index. **CONTACT:** W. Bresnahan 427-2545
	Fuel Classification	Energy/Forestry	To store data collected about the various types of organic matter that contribute to forest fires within the province of Alberta. (Micro) **CONTACT:** Terry Van Nest 427-6807
	Innovacq On-line Acquisition System	Education	To provide for on-line ordering of library materials. Interfaces with 'On-line Cataloguing and Reference', and with University of Toronto Library Automation System (UTLAS). **COMMERCIALIZATION STATUS:** Proprietary Software **CONTACT:** Shirley Wolodko 427-2985
	Inter-Library Loan	Culture	SPSS Analysis of Inter-Library Loans for Library Services, Department of Culture. Data is analyzed every month and statistics are sent to Library Services. **CONTACT:** Mary Louise Pett
	IRM Technical Library Catalogue	Family & Social Services	This system provides administrative support in managing the resources of the IRM technical library. (Mainframe) **CONTACT:** Peter Trommelen 441-6711

	University of Toronto Library Automation System (UTLAS)	Environment	Online system to access University of Toronto's cataloging system for AEC library holdings and to search library databases in North America. **CONTACT:** L. Nordstrom 149-1261 (RITE)
Medical Care	Aids to Daily Living	Health	This system maintains clients, authorizations, claims and inventory information for the Alberta Aids to Daily Living program. **CONTACT:** Terry Oakes 422-9449
	AMIIS	Health	A microfilm indexing and retrieval system for registrant and claim data. **CONTACT:** Rob Jephcott 427-1048
	Community Health Immun. & Nursing Activity (CHINAS)	Health	A PC based system that keeps track of school immunizations and nursing activity. **CONTACT:** Terry Oakes 422-9449
	Environmental Health System	Health	This system is composed of three subsystems (food, waste and swimming pools). It is used by Environmental Health. **CONTACT:** Terry Oakes 422-9449
	Fee Impact Calculation	Health	This ADABAS online/batch system uses previous years utilization data to calculate the impact of changes to benefit rates and transfers new rates to the Schedule of Benefits System. **CONTACT:** Rob Jephcott 427-1048
	Food	Health	A PC based system that stores data about each of the food premises within a Health Unit. This includes general information about the establishment together with information about all inspections conducted by Public Health Inspectors. **CONTACT:** Terry Oakes 422-9449
	Hepatitis	Health	Recording/reporting Hepatitis B vaccines. **CONTACT:** Terry Oakes 422-9449

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Medical Care	Home Care – Local System	Health	PC based system that keeps track of information for Home Care clients, services, billing and management reports in the 27 Health Units. On a monthly basis, a summary diskette of information is sent into the Provincial system. **CONTACT:** Terry Oakes 422–9449
	Home Care – Provincial System	Health	A PC based system that accumulates and reports the monthly summary Home Care data that is sent in from the 27 Health Units using the local Home Care system. **CONTACT:** Terry Oakes 422–9449
	Hospital Reciprocal Billing System	Health	As provided under the interprovincial reciprocal agreements. A computer system for entering, validating, and paying health services claims. a) To reimburse Alberta Hospitals for services provided to out–of–province residents, then preparing a claim to the patient's home province. b) To reimburse other provincial plans for services paid on behalf of Alberta Residents. Interfaces with Registration, Claims & other provincial plans. **CONTACT:** Rob Jephcott 427–1048
	Immunization	Health	Provides user with reports on Clinical Immunizations. **CONTACT:** Terry Oakes 422–9449
	Influenza	Health	Provides user with annual reports and records data on administration of influenza vaccine. **CONTACT:** Terry Oakes 422–9449
	Laboratory Data Information System	Health	This environmental health system produces reports on province–wide laboratory results. **CONTACT:** James Steele 427–2643
	Medical Reciprocal Billing	Health	A system that processes medical claims according to interprovincial agreements for reciprocal processing of out of province medical claims; a) process of claims submitted by Alberta Physicians; b) Invoice Home Provinces for payments to Alberta Physicians or residents of Home Provinces; c) receipt of invoice details from host province and payment of invoices. **CONTACT:** Rob Jephcott 427–1048
	Medilink	Health	A communication system that will allow practitioner access to registration, benefit code and claims information and direct submission of claims. **CONTACT:** Rob Jephcott 427–1048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Medical Care	Mental Health	Health	This system records data provided by therapists on patients who receive treatment in clinics operated by the Mental Health Branch at many locations in the Province. **CONTACT:** Terry Oakes 427-9449
	Morbidity System	Health	A batch system for recording all diagnostic information of patients discharged from acute care and auxiliary hospitals. Data is utilized to monitor institutional utilization, and inpatient movement within the province. Interfaces with Professional Activity Study of the Commission on Professional & Hospital Activities (CPHA) and Hospital Medical Records Institute (HMRI). **CONTACT:** Terry Oakes 422-9449
	Notifiable Diseases	Health	Keeps track of cases of certain diseases which must, by law, be reported to the Government. **CONTACT:** Terry Oakes 422-9449
	Nursing Activity	Health	Provides user with reports on Nursing Activity throughout the Province. Reports are sorted by and sent to local health units. These reports provide Nursing Supervisors and Medical Officers with statistics for use in program planning, staffing and budget requests. **CONTACT:** Terry Oakes 422-9449
	Practitioner Information Retrieval System (PIRS)	Health	An information system assisting in the evaluation of practitioner billing practices. **CONTACT:** Brent Sorken 427-1466
	Practitioner Registry	Health	An ADABAS online/batch system to register and report on all practitioners in Alberta. **CONTACT:** Rob Jephcott 427-1048
	Practitioners Profiles System	Health	A system to allow the monitoring of practitioners activities. **CONTACT:** Rob Jephcott 427-1048
	Psychological Assessment System (MMPI)	Solicitor General	A psychological testing package given to inmates to evaluate and interpret personality tests, intelligence tests, neurophyschological tests and physiological factors. This system is in the process of being replaced by a Test Battery System. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Mansoor Derakhshan 427-0366

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Medical Care	Reproductive Health	Health	A PC based system that accumulates quarterly summary data that is supplied by the Family Planning programs in Alberta. The data is then reported on an annual basis and is used to generate the Family Planning Annual Report. **CONTACT:** Terry Oakes 422-9449
	Schedule of Benefits	Health	A system to capture and maintain information required to print schedules of benefits for all disciplines and to print schedules for the disciplines. Interfaces with fee impact calculation and claims processing systems. **CONTACT:** Rob Jephcott 427-1048
	Sessional Physicians Information System	Health	This system records data provided by the Mental Health Branch central office regarding physicians who provide services at mental health clinics to patients on a contract basis. **CONTACT:** Terry Oakes 427-9449
	Social Hygiene	Health	Provides user with reports on persons examined for sexually transmitted diseases in clinics operated by the department. **CONTACT:** Terry Oakes 422-9449
	Speech Pathology System	Health	A PC based system that records services provided to, and status of, clients with speech and/or hearing problems. **CONTACT:** Terry Oakes 422-9449
	T.B. Screening	Health	Provides user with annual reports on the Tuberculosis Control School Survey program based on the school year. Records school nursing activity for TB testing. **CONTACT:** Terry Oakes 422-9449
	T.B. Services	Health	The PC based system maintains files of all the TB patients in Alberta. Records are kept of tests, treatments and results and checkup notices are sent out. **CONTACT:** Terry Oakes 422-9449

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Medical Care	Test Battery System	Solicitor General	A micro based set of psychological tests used to evaluate adult and young offenders in the custody of Alberta Solicitor General. This software was custom developed by a vendor for Correctional Services Psychological testing. The vendor charges the department for the use of the software on the basis of the volume of tests performed. **COMMERCIALIZATION STATUS:** Not available **CONTACT:** Mansoor Derakhshan 427-0366
	Tone Talker	Health	A PC based system that collects statistics concerning calls and selections made to the Provincial AIDS Hotline number. **CONTACT:** Terry Oakes 422-9449
Miscellaneous	3-M Filing System	Energy/Forestry	Microcomputer interface to 3-M microfilm reader for indexing and accessing accounts payable documents. **CONTACT:** Marilyne Emerson 427-3605
	A.P.I.X. Downloading	PWSS	Application will download data from TSO (mainframe environment) to a PC, convert data to WordPerfect 5.0 secondary mail merge file. **CONTACT:** Personnel Division, Divisional Support 427-4359
	Abandoned Vehicle System	Solicitor General	This system is used by the Motor Vehicle Accident Claims Unit to record incidents of vehicles being abandoned by their owners. **COMMERCIALIZATION STATUS:** Available **CONTACT:** Michael Hurks 427-0366
	Action Request	Health	A PC based system that monitors and tracks correspondence that is sent to the Minister. **CONTACT:** Terry Oakes 422-9449
	Action Request Database	Education	Maintains a record of Action Requests and provides for tracking, inquiry and reporting. Uses dBase III. **CONTACT:** Liz Duncalfe 427-2041
	Alberta Logo Routine	Transportation/Utilities	This system will plot the Alberta logo for varying sizes and angles, and will also plot the Alberta crest. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Miscellaneous	Athlete Information System (CGame/AGame)	Recreation and Parks	(Several similar systems) Provides management of (Coach/manager/athlete) data for various teams that represent the Province at "Games" events – (i.e. Artic Games, Western Canada Summer Games etc.). System also provides camera–ready information pages for inclusion in the Media Guide, as well as a variety of other output – reports mail labels, etc. **CONTACT:** Director, Provincial Recreation and Sport Services
	Automated Records Tracking System (ARTS)	Alta Mortgage & House (Municipal Affairs)	To provide an automated records management system. It manages records from various departments of the corporation which are sent for storage (VAX 11/780/8600 Cluster) **CONTACT:** Information Systems Branch 427–4867
	Basic Well Miscellaneous	ERCB	Provides for the maintenance of a wide variety of basic well data e.g. licence transfers, agents, well name changes, licence date, elevation and historical well identifiers. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–4506
	Blue Lake Information System	Recreation and Parks	This is a microcomputer system used to maintain the courses and course applicants at the Blue Lake Centre. Particular financial aspects related to the Blue Lake Centre and it's courses are also maintained by this system. **CONTACT:** Supervisor, Blue Lake Centre 132–8312

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Modelling/Forecasting	Market Forecast System	Treasury	Facilitates the recording of forecasts of strategic indicators, on both U.S. and Canadian markets, by the portfolio managers. Reports projecting market moves are calculated and produced. (Micro) **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** Allen Benbow 427-9920
	Multi-Storm Event Model	Environment	Simulates impact of urban storm event run off on river water quality from inputs of upstream river flow quality. Also simulates timed discharge and quality data of major storm sewers, combined sewers and sewage treatment plan during run off. **CONTACT:** John Campbell 427-8985
	Pollution Simulation System	ERCB	Pollution modelling. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Putting Reporting of Finances in Touch (PROFIT)	Agricultural Dev. Corp.	A standalone micro based application, developed in ORACLE to analyse information contained in the GAGE questionnaire. **CONTACT:** Supervisor, Production Systems 679-1311
	Reservoir Simulation System	ERCB	Petroleum reservoir modelling. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Space - M System	Energy/Forestry	Provides output of adjusted values of photo control points. Co-ordinates of all points are listed with values in the ground survey reference system. The method used is semi-analytical, with input from independent model measurements. Program allows for adjustments of very large blocks of models with a minimum amount of ground control. System was designed and is supported by the Federal Government. **CONTACT:** B. Mackenzie 427-7915
	Stats and Economic Studies Applications	ERCB	Modelling and analysis of population statistics for Economics Department. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Modelling/Forecasting	Stochastic River Quality Model (SRQM)	Environment	Simulates steady-state river water quality with inputs of river flow, upstream river water quality, pointsource discharge rates and discharge quality. Deals with dissolved oxygen-related parameters, nutrients or specified individual substances. CONTACT: John Campbell 427-8985
	Water Availability for Licencing (WAFL)	Environment	Reconstructs natural streamflow on small watersheds and assesses water available for new licences. CONTACT: Ron Bothe 427-6277
Project Management	Aerial Photograph Flight Schedule System	Transportation/Utilities	This system schedules aerial photographic flights which are conducted by the Department. CONTACT: Don McTavish 427-8690
	Bridge Inspection and Management System	Transportation/Utilities	This system generates bridge inspection forms containing latest bridge information used for inspection of bridges and culverts in the province. There are 27 different form types depending on bridge/culvert type. CONTACT: Don McTavish 427-8690
	Capital Project Reporting System	Health	Centralization of Department Information on all capital construction projects. CONTACT: Brent Sorken 427-1466
	Change Management System	Energy/Forestry	An IDMS based on-line system to manage change to the Mineral Revenues System. It is adaptable for other systems. Major benefit is a change request status is accessible on-line by users through the same terminals (3270 type) they access MRS. CONTACT: John Finlaison 422-4764
	Civil Engineering Status Reports	PWSS	Provides reporting on the status of Civil Engineering Contracts. CONTACT: Management Services Branch, Systems Section 427-2222
	Construction and Maintenance Project System	Energy/Forestry	To provide an inventory control system for sites, buildings, mobile units and special contents belonging to AFS; to track the progress of projects and work orders; to maintain information on housing rented by AFS from Municipal Affairs. (Micro) CONTACT: John Boonstra 427-3529

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Project Management	Construction Program Management System (CPMS)	Transportation/Utilities	CPMS is a department-wide DBZ information system servicing head office and regional staff throughout the province, assisting in the management of construction project information. **CONTACT:** Don McTavish 427-8690
	Consultant Inventory System	PWSS	Microcomputer based system which records consultant information for each project that is done. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Consultant Registry Index	Recreation and Parks	Maintains a database of consultants organized by discipline and location. Points out selection lists, mailing labels and fact sheets. **CONTACT:** Director, Administration and Technical Support Branch 427-0012
	Contractor Production Information System	Transportation/Utilities	This system is used to monitor construction progress by a contractor's production on a project. The system records project description, contractor information, contract numbers and projected quantities, progress to date and balance remaining. Reports are generated showing a contractor's work load, progress, program status, etc. **CONTACT:** Don McTavish 427-8690
	Dams Action Request System	PWSS	A PC system used to keep track of minister/deputy, minister and ADM action requests. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Farm Water Grant System	Transportation/Utilities	To track grants paid and status of projects receiving grants. (WANG PC) **CONTACT:** Bob Ferguson 427-8690
	Fire Inspection Reporting System	Labour	To manage the scheduling, allocation and supervision of inspection resources as well as to organize, manage and measure code enforcement programs. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Geophysical Administration Support System	Energy/Forestry	To assist in the approval and administration process of exploration applications submitted by various oil and gas companies within the province of Alberta. (Micro) **CONTACT:** Herman Selcho 427-3582

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Project Management	Information Change Request Tracking System	Treasury	Provides real time data-entry, location (responsibility), status, inquiry, searching and browsing facilities for the control of Information/Change requests. TSO/ISPF Dialog Manager-based. Supplementary Management Reports. **CONTACT:** F. Scarfone 427-0682
	Information Services Planning System	Transportation/Utilities	This system maintains project and budget information. The system is used for project planning, status reporting and budget preparation for the Information Services Branch. **CONTACT:** Andrew Brown 427-8690
	Inno. Housing Grant Info.	Municipal Affairs	Provides project status tracking, research publication and dissemination, bibliographies data (IBM PC/XT) **CONTACT:** Lloyd Livingstone 427-4868
	Intelligent Fire Management Information System	Energy/Forestry	To provide spatial evaluation of potential forest burning conditions; to provide analyses of preparedness, initial attack requirements and allocation of initial attack resources; to provide recommendations on initial attack strategies. (Micro) **CONTACT:** Terry Van Nest 427-6807
	Keyword Project Index Directory	Labour	Microcomputer data storage and retrieval system to capture various topics of research projects done within the branch. It provides a historical database of topics that can be referenced for future research use. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Lease Status System	PWSS	Track progress of lease negotiation. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Minister's Action Request System	PWSS	A multiuser system to log Minister's correspondence, to initiate action requests to all departments and to keep track of all CFEP applications and correspondence. (PC) It also archives the completed action requests into a separate system. **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** Management Services Branch, Systems Section 427-2222
	Project Control System	Transportation/Utilities	This is a small administrative system used by Research and Development Branch for project scheduling. **CONTACT:** Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Project Management	Project File Index File System	PWSS	The existing PFIF system was a stand-alone system. The system was rewritten for multius and seven more search keys. The system tracks all information dealing with Capital Proje Identification Numbers. (Project Management Capital Development) CONTACT: Management Services Branch, Systems Section 427-2222
	Project Management	Family & Social Services	A number of systems for budgeting as well as project management for Production Service CONTACT: Peter Trommelen 441-6711
	Project Management and Planning Tool (PMPT)	Environment	Assists project managers in monitoring project work schedules. CONTACT: Wm. Simon 427-5971
	Project Management System	Transportation/Utilities	An on-line system to track schedules and costs of activities associated with planning designing and constructing bridges. CONTACT: Don McTavish 427-8690
	Project Reporting System (PRS)	PWSS	Budget/Expenditure Tracking and Scheduling system for tenant improvements projects (Micro based) CONTACT: Management Services Branch, Systems Section 427-2222
	Project Scheduling and Cash Flow	PWSS	Analyses encumbrances and payments recorded against projects within Capital Development Provides status information; actual to budget. CONTACT: Management Services Branch, Systems Section 427-2222
	Project Scheduling System	Transportation/Utilities	This system will keep track of the stages of each construction design project. The system wil store data like the project number, name, type of project, target and contract dates for variou phases, etc., and will allow retrieval, sorting, summarizing, etc. CONTACT: Don McTavish 427-8690
	Project Time Management System (PTMS)	Treasury	To keep track of the status and time spent on various types of projects by Systems Staff. To assist Management in resource planning and release planning. CONTACT: J. Parton 427-9416
	Project Tracking System (PTS)	PWSS	System used by Technical Resources Division to manage, review and communicate with others on their projects on a divisional basis. CONTACT: Management Services Branch 427-2222

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Project Management	Projects	PWSS	Interactive program for project information. **CONTACT:** Management Services Branch, Systems Section 427-2222
	Random Contractor Selection System	PWSS	The system was developed to record the contractor and project information, to select eligible contractors randomly to perform tenants improvements projects, to maintain a history of all contractors who were invited to bid on projects and to generate reports for Construction Management Branch of Accommodation Planning Division. (PC) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Resource Dispatch	Energy/Forestry	To monitor the allocation of resources used for fighting fires. Resources include manpower, equipment and supplies. (Micro) **CONTACT:** Keith Peters 427-6810
	RTS Construction Report	Transportation/Utilities	This system keeps track of road construction and maintenance on a fiscal year basis. Contains mileage information of existing and not opened roads on a county basis plus number of miles of road constructed and maintained by type of grant to a county. **CONTACT:** Don McTavish 427-8690
	Service Request System	Treasury	Facilitates the management of system service requests received from Finance Branch division. Enables the tracking and status reporting of these requests and provides a database of historical requests. (Micro) **CONTACT:** Allen Benbow 427-9920
	Site Development Work Order Minutes	PWSS	Keeps track of site development and land acquisition work order minutes information and reporting. (Micro) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Tech Service Work Order Minutes	PWSS	Keeps track of work order minute status. Reporting included. (Micro) **CONTACT:** Management Services Branch, Systems Section 427-2222
	Time Reporting System	Transportation/Utilities	This system maintains information pertaining to project assignments for Information Services Branch's staff. The system is used for human resource management. **CONTACT:** Andrew Brown 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Project Management	Transfer Request System	PWSS	Microcomputer based system which contains all information for each project that has had Intents, Acceptances, Completions, etc. done up for it and stored in the Project Management Records Unit. CONTACT: Management Services Branch, Systems Section 427-2222
	Unit Prices and Bid Quantities System	Transportation/Utilities	This system manages information on Alberta Transportation contracts with construction companies. Its main function is to determine the average unit prices for bid items so that when new tenders are received, their "reasonableness" can be evaluated. CONTACT: Don McTavish 427-8690
	Work in Progress System	PWSS	Provides reporting on the Financial Status of Capital Projects during the Design Phase. CONTACT: Management Services Branch, Systems Section 427-2222
Records Management	Administrative Index System	PWSS	Microcomputer based system which keeps track of the administrative files in the Project Management Records Unit. CONTACT: Management Services Branch, Systems Section 427-2222
	Building Project System	PWSS	A small system to keep track of project files for Technical Resources. (PC) CONTACT: Management Services Branch, Systems Section 427-2222
	Case File System	Consumer & Corp Affairs	On-line system to record numbers and names on file with the Securities Commission. Limited to name, file number, file status and cross-referenced files. Custom written (TIS/CM, MANTIS, TOTAL). CONTACT: John Rebstock
	Correspondence Management Information System	Energy/Forestry	A system used to record and track the status of responses to incoming departmental mail. CONTACT: Andy Masiuk 422-9498
	Document Information System	Consumer & Corp Affairs	Maintains a record of each document stored on the Securities Commission's files. CONTACT: Sue Churchill

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Records Management	Document Retrieval System	Treasury	Stores official Treasury documents in mainframe computer files and maintains microcomputer index files to those documents based on words and phrases that they contain. Authorized users can perform sophisticated searches and browse documents to retrieve required information. Based on proprietary mainframe and micro software – customized. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** F. Scarfone 427–0682
	File Retrieval System	Energy/Forestry	A micro based system used to record the location of microfilmed documents processed through accounts payable. **CONTACT:** Marilyn Emmerson 427–3605
	File Tracking System	Consumer & Corp Affairs	Automated bring forward/out card system designed to track and report on all files which are requested for bring forward and all files which are currently out of the file room. dBase III on micro. **CONTACT:** Sue Churchill
	File Tracking System	Energy/Forestry	Provides file location information on surface, subsurface file folders. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** N. Dalton 427–7430
	General Functional System	PWSS	Microcomputer based system which keeps track of general files in the Project Management Records Unit. **CONTACT:** Management Services Branch, Systems Section 427–2222
	Records Centre (RECC)	Environment	System for storage and retrieval of information in Records Centre. **CONTACT:** Paul Valentine 427–6279
	Records Inventory Management System (RIMS)	PWSS	Tracks the location of stored records in the Alberta Record Centre and brings forward those records due for disposal or final archiving. **CONTACT:** Management Services Branch, Systems Section 427–2222
	Semi Active Records	Labour	A system which controls the disposition of what is termed 'semi–active' (old memoranda and documents) records of the Department through processes of storage or disposal. **CONTACT:** J. Stocco, Systems Branch 427–9048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Records Management	Systematic Control and Management of Public Records	PWSS	A PC system which supports the departmental records management functions. (SCAMP) CONTACT: Management Services Branch, Records Management and Library Services Branch Manager 427-2222
	Treasury Board Directives Index System (TREBIX)	Recreation and Parks	Produces an index of Treasury Board Directives by the TBD number. CONTACT: Director, Financial Services 427-2901
	Volume Information System	Consumer & Corp Affairs	Maintains a record of all volumes for every file in the Securities Commission. Indicates for each volume whether it is active, boxed, microfilmed or destroyed. CONTACT: Sue Churchill
Scientific/Research	Air Quality Data from Field Monitors (AMAP)	Environment	Includes all air monitoring analysis programs: urban air quality monitoring, sour gas trailers, hi-vol analysis, AQMR etc. and general computer operations. CONTACT: Dave Asquin 427-5893
	Atmospheric Env. Service Climatic Data (CLIM)	Environment	System composed of Alberta meteorological data and related retrieval and processing software. CONTACT: Ron Bothe 427-6277
	Census Data	Municipal Affairs	Census data entry, edit and analysis for Planning Research. (Wang PC) CONTACT: Lloyd Livingstone 427-4868
	Dam Safety Engineering System	Environment	Engineering programs to predict seepage through embankment dams, analyse fluid retaining structures and model the downstream conditions from water release. CONTACT: Vern Head 422-1360
	Data Acquisition from Field Monitors (DACQ)	Environment	Minicomputer based system to acquire and monitor environmental data for flow forecast, water management. CONTACT: Ian Barnaby 427-6278
	Design Civil Engineering System (DCES)	Environment	System for earthwork, structural and hydraulic design. CONTACT: K. Nyhus 427-6140

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Scientific/Research	Duration Curve Plotting Program (DURC)	Environment	Provides duration analyses incorporating large hydrometric data files. CONTACT: Ron Bothe 427-6277
	Earth Sciences Laboratory Support (ELAB)	Environment	Automation system to support laboratory analysis on soil and groundwater environmental concerns. CONTACT: Roger Ambrosi 427-6182
	Earth Sciences Lethbridge Lab Support (ESDL)	Environment	Provides access to general purpose computer facilities for statistical analyses and model calibration. CONTACT: Henry Regier 381-5322
	Einstein Sediment Transport Programs (EINS)	Environment	Detailed calculation of complex sediment transport rates. CONTACT: Jim Choles 427-6280
	Freeway Capacity Calculations	Transportation/Utilities	This program performs freeway capacity calculations using "Freeway Capacity Procedures" published by the Federal Highways Administration (FHWA) of the U.S. Transportation Research Centre, Polytechnic Institute of New York. CONTACT: Don McTavish 427-8690
	Gas Aid Program	Transportation/Utilities	To study gas network design systems. (U of A) CONTACT: Bob Ferguson 427-8690
	General Computing at U of A (UOFA)	Environment	Use of MTS for engineering calculations and for accessing externally developed engineering databases. CONTACT: Ken Lang 427-6150
	Graphics System for Hydrology (PDGS)	Environment	Consists of a graphic display terminal and photocopy unit for displaying output from HMSA, CLIM and HDAF systems. CONTACT: Ron Bothe 427-6277
	Ground Water Well Data (GWWD)	Environment	Catalogue of water wells in Alberta. CONTACT: B. Dousse 427-6230

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Scientific/Research	Hec Scour and Deposition in Rivers and Res. (HEC6)	Environment	Calculate river bed scour and sediment transport, depositional patterns in rivers and reservoirs. CONTACT: Jim Choles 427-6280
	Hec-Water Surface Profile Simulation (HEC2)	Environment	Allows analysis of drainage ditch flows for projects in Northwest Alberta. CONTACT: Brian Farley 427-6170
	Hydrogeology Digitizing System (HGDS)	Environment	Digitalizing of hydrographs from observation well network. CONTACT: Joe Marciniuk 427-6230
	Hydrometeorological Data Adjust Facility (HDAF)	Environment	Consists of historical natural stream flow data sets for Alberta and related retrieval, analytical and processing software. CONTACT: Ron Bothe 427-6277
	Hydrometeorological Statistical Analysis (HMSA)	Environment	Inter-connected programs for frequency analysis, hydrograph development, data statistics, hydrologic model input and probable maximum flood analysis. CONTACT: Ron Bothe 427-6277
	Hydrometric Database File (HDBF)	Environment	System comprised of an archive of Alta. Hydrometric data and related retrieval and processing software. CONTACT: Ron Bothe 427-6277
	Insurance Loss Control System	Treasury	This system reports statistical results monthly of all reported incidents for Insurance and Risk Management, Treasury, in order to obtain an overview of total government loss position. CONTACT: R. Whitehouse 427-4134
	Irrigation Canal/Res. Discharge System (ICRD)	Environment	Provides water level and canal flow discharge information for irrigation reservoirs in Southern Alberta. CONTACT: Bob Curtis 181-5974 (RITE)
	Lab Materials Testing Program	Transportation/Utilities	These programs are used for materials testing and analysis of materials testing data. CONTACT: Don McTavish 427-8690

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Scientific/Research	Land Survey Computations (LSCP)	Environment	Collect and verify survey data, perform calculations for engineering control and hydrographic surveys and format data for various survey users. CONTACT: J. Simanovskis 427-6279
	Linear Regression Analysis Program	Transportation/Utilities	This program calculates a number which measures a relationship between two sets of scores with equal sample sizes. The program provides correlation relationships and scattergrams to investigate this relationship. CONTACT: Don McTavish 427-8690
	Material Testing Laboratory Automation (MTLA)	Environment	Automation of geotechnical testing laboratory. CONTACT: Larry Kolody 427-6279
	Municipal Water Quality Data Storage (MUNI)	Environment	Storage and management of water and waste water quality parameters. CONTACT: S.M. Fazal 427-5837
	One-Dimensional Hydrodynamic Model (ODHM)	Environment	One-dimensional hydrodynamic model used for simulating surface water levels. CONTACT: Ron Bothe 427-6277
	Paint Stripe Evaluation	Transportation/Utilities	This program summarizes the rating of paint types which have been applied on provincial highways. It calculates a final score for all paints and ranks them. CONTACT: Don McTavish 427-8690
	Pavement Evaluation Testing Crews Expenditure	Transportation/Utilities	This system is used for control of the Sufficiency Sections Mobile Testing Crews weekly expenditure. It summarizes each testing crew's expenditure, work hours, location of test performed, etc., on a weekly and yearly basis. CONTACT: Don McTavish 427-8690
	Pesticide Database System (PDBS)	Environment	Compilation and analysis of data related to Pesticide Vendor licenses. CONTACT: Jim McKinley 427-5855
	Pesticide Licence and Permit System (PLPS)	Environment	Compilation and analysis of data related to Pesticide Applicator licenses. CONTACT: Jim McKinley 427-5855

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Scientific/Research	River Engineering General Operations (REGO)	Environment	Performs hydraulic engineering calculations and calculation of river processes and behaviour. CONTACT: Jim Choles 427-6280
	River Forecasting General Operations (RFGO)	Environment	Hydrological analysis associated with flood forecasting, water supply forecast and streamflow monitoring for water management. CONTACT: Thai Nguyen 427-6278
	Shelterbelt Distribution System	Agriculture	Tree distribution and research information system. CONTACT: A. Nelson 427-2101
	Soil Analysis System	Agriculture	Computerized soil analysis report for farmers. CONTACT: Keith Toogood 427-2101
	SSARR River Forecasting Model (SSAR)	Environment	Use of SSARR program for hydrological analysis associated with flood forecasting, water supply forecasting and streamflow monitoring for water management. CONTACT: Thai Nguyen 427-6278
	Stacks, Plumes and Flares System (SPFS)	Environment	Calculate stack heights for plume dispersion for proposed and existing industrial facilities. CONTACT: C.S. Liu 427-5872
	Survol Earthwork Design Program (SEDP)	Environment	System for automated earthwork design. CONTACT: Kris Haugland 427-6140
	Tri Creek Data Analysis	Energy/Forestry	This system stores climatic, pedogenic and vegetational data at the test site. CONTACT: A. Nip 962-8700
	Vendor Number Inquiry System	Treasury	The system assigns a 6 digit number to regular vendors who receive payment for goods or services rendered.Interfaces with Payment of Accounts. CONTACT: F. Scarfone 427-0682
	Water Analysis Results Storage System (WADS)	Environment	Data storage and printing of chemical water analysis. CONTACT: F. Dieken RITE 149-1261

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Scientific/Research	Water Quality Data Management (WQDM)	Environment	Storage, retrieval and analysis of water quality data. CONTACT: Ron Tchir 427-5893
	Water Resources Management Model	Environment	System for effective planning of use of water in river basis. CONTACT: R. Harrison 427-8985
	Water Rights Data for Dams (WATD)	Environment	Programs for maintaining Dam Safety records and generate reports. CONTACT: Metro Chrapko 427-6260
	Water Survey Computations (WSCP)	Environment	Computation for the presentation of hydrometeorological data and digitization of hydrometeorological data. CONTACT: G. Coles 427-6279
	Water Use Information System (WUIS)	Environment	System for river basin planning, provincial water management and administration. CONTACT: Joe Lennon 427-2375
	Weed Aiert System	Agriculture	This system is used to maintain weed alert sighting related information and aid the user in facilitating the weed control program. CONTACT: Keith Toogood 427-2101
	Worksite Hazardous Materials Information System (WHMIS)	Personnel Admin.	An integrated database system using Clipper on microcomputer. Contains information regarding departmental inventories of chemical products, manufacturer's name/address directory, Alberta Government worksite addresses and distributors, supplier's name/address. Departmental data received from departments for input on a calendar year basis. CONTACT: Roy Chough 427-4416
	Yield Information Database	Agriculture	Analyses of crop yield data, using both SIDMAP and AHCIC databases. Is SAS based. CONTACT: Keith Toogood 427-2101
Social Services	Adoption Matching	Family & Social Services	The Adoption Matching system uses information about children from the Child Welfare Information system and processes this data against desired characteristics of prospective adoptive parents to generate lists of potential adoptees. Mainframe based system. CONTACT: Ellen Pedersen 441-6711

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Social Services	Alberta Social Resources Inventory (ASRI)	Family & Social Services	This is a microcomputer database describing some 4,200 Social Services agencies/groups across Alberta. It is used primarily to publish directories for the use of community professionals to assist in referring clients to available community support. CONTACT: Andrew Pietruch 441-6711
	Auxiliary Still-in Patient System	Health	This system maintains records of all patients still staying in auxiliary hospitals. Interfaces with the Morbidity System. CONTACT: Terry Oakes 422-9449
	Child Welfare Case Management	Family & Social Services	This system was developed to fill an interim need of automating the creation and maintenance of the Child Welfare Case investigation, case planning and case review documentation until a complete system is provided as part of the new Child Welfare System (currently under development). CONTACT: Darlene Swabb 441-6711
	Child Welfare Information System (CWIS)	Family & Social Services	This system maintains a directory of Child Welfare Case Management activities including initial investigation notes, guardian-ship status of children in care, their current locations and other family related data. CONTACT: Ellen Pedersen 441-6711
	Day Care Staff Qualifications Registry	Family & Social Services	This microcomputer system tracks all staff working in Day Care Centres and their level of training and qualifications. CONTACT: Ellen Pedersen 441-6711
	Employment Support System	Family & Social Services	This microcomputer system tracks payroll and case related information on handicapped individuals employed independently in the work force. CONTACT: Don McGregor 441-6711
	Handicapped Children's Services System (HCS)	Family & Social Services	This is a microcomputer based system that maintains information on the agreements made between parents with handicapped children and the department. Information relates to the funding of specified services to meet the needs of the child. CONTACT: Don McGregor 441-6711

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Social Services	Municipal Affairs Registry	Municipal Affairs	This system provides an up–to–date listing of senior citizens seeking rental accommodation in the Province. **CONTACT:** Lloyd Livingstone 427–4868
	Public Guardian System (PGS)	Family & Social Services	This is a micro based system that tracks individuals under public and private guardianship roles. It captures basic client data, assessment information and records both legal and medical costs the department has incurred. **CONTACT:** Don McGregor 441–6711
	Residential Services Information System (RSIS)	Family & Social Services	This system keeps track of adults and children who spend time in provincially funded residential facilities. This is a mainframe based system. **CONTACT:** Don McGregor 441–6711
	Therapeutic Abortion System	Health	A batch registry of all abortions performed in Alberta. Used to monitor standards and requirements for Hospital Abortion Committees. **CONTACT:** Terry Oakes 422–9449
	Widows Pension	Family & Social Services	This system records eligibility information as well as financial requirements of clients of the Widow's Pension Program. Interfaces with Client Index. **CONTACT:** Peter Trommelen 441–6711
	Women's Shelter Information System (WSIS)	Family & Social Services	This system gathers information on all the admissions to Women's Shelters in the province and produces summary reports for each shelter. **CONTACT:** Ellen Pedersen 441–6711
Stats/Data Collection	Accident Analysis System	Transportation/Utilities	To produce a reasonably clean computer file for SPSS analysis re: traffic safety factors and program evaluation. **CONTACT:** Don McTavish 427–8690
	Adolescent Treatment Info. System	AADAC	Maintains admission, demographic, treatment and discharge statistics on those adolescents and collaterals who participate in AADAC's Adolescent Treatment Program. **CONTACT:** Art Dyer, Manager 427–4275 Program Analysis and Information

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Alberta Animal Record	Culture	Animal sightings in the Province of Alberta are recorded. This information is particularly useful in environmental studies when a large project, such as the Syncrude project is being considered for development. **CONTACT:** Dr. Philip Stepney
	Alberta Blue Cross System	Health	A batch system that provides statistics on claims paid by Alberta Blue Cross on a quarterly and yearly basis. **CONTACT:** Brent Sorken 427-1466
	Alberta Forestry Messaging System	Energy/Forestry	An electronic mail system used for forest fire prevention and suppression. **CONTACT:** Bill Griggs 427-6810
	Allowables Surveillance System	ERCB	Maintenance and reporting of allowables data. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Animal Health Submission Analysis Reporting System	Agriculture	AS/400 application to keep track of pathology mammal or poultry submission information for online inquiry and batch reports. **CONTACT:** R. Pungor 427-2101
	Animal Incident Reporting	Energy/Forestry	Mainframe system which records and analyzes various animal-related occurrences such as property damage, found wildlife, nature harvest, enforcement and miscellaneous. **CONTACT:** R. Adams 427-8205
	Apartment Vacancy Survey	Municipal Affairs	Captures and tabulates data gathered from the survey of Apartment Vacancy and rental cost across the province on an annual basis. **CONTACT:** Lloyd Livingstone 427-4868
	Assessment Equalization	Municipal Affairs	Allow input of tax roll data for municipalities, etc., and calculate equalized tax assessments based on various formulae. Includes inquiry facilities, and production of worksheets for field assessors. **CONTACT:** Lloyd Livingstone 427-4868

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Attitude Survey System	Education	Facilitates the design of questionnaires, the subsequent data tabulation and reporting of results in both statistical and graphics form. Uses an AZTEC shell. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** John Burger 427-2991
	Attorney General Medical Examiner System (ATME)	Attorney General	This microcomputer system assists in the tracking and maintenance of all medical examiner cases; the retention of historical data for statistical analysis. **CONTACT:** Dr. John Butt 297-8123
	Automated Lightning Detection System	Energy/Forestry	To provide real-time information on the occurrence and progress of lightning. Hardware and software are proprietary products of Lightning Locations and Protection Inc. **CONTACT:** Bill Griggs 427-6807
	Battery Test Verification	ERCB	Provides access to proration battery information and allows for the selection and maintenance of the test verification information. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Big Game Incisor Bar Survey and Telephone Questionnaire	Energy/Forestry	Collection and processing of data allows for statistical analysis on harvest of big game by wildlife zone, age, sex and date. The questionnaire subsystem involves the generation, capture and analysis of questionnaire forms. The findings are used to support the setting of quotas for the coming hunting season. **CONTACT:** S. Schurmann 422-9534
	Bridge Rating & Analysis of Structures	Transportation/Utilities	This program is used for analyzing all types of bridges, except for truss and pre-stress concrete bridges. The analysis is used to rate the bridge superstructure. The program was obtained from the Wyoming State Highway Department in 1980. **CONTACT:** Don McTavish 427-8690
	BWD Current Designations	ERCB	Provides for the maintenance of Board Orders. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	BWD Drill Stem Test	ERCB	Provides for the maintenance of Drill Stem Test data and assists Oil, Gas, Geology and Oil Sands departments in the analysis of fields, pools, formations and reserves. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Geological	ERCB	The system provides labels and Licence Amendment Report in addition to processes for G–1 Tops and Markers. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Incentives	ERCB	Provides for the maintenance of incentives data and assists Geology department in monitoring the overall incentives policies. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Licencing	ERCB	Provides for the maintenance and reporting of Well Licence information. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Log Data	ERCB	Provides for the maintenance of Well Log data. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Oilsands Production and Injection	ERCB	Provides the on–line query and reporting capabilities for Oil Sands Production and Injection data. The system also maintains the experimental and confidential status for the Wells. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Statistical Reporting	ERCB	Reporting of various Basic Well data based on geographic area, field/pool, intervals, status, operator and dates. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	BWD Tours Reporting	ERCB	Provides for the maintenance and reporting of drilling and completion information for the wells. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	BWD Well Status	ERCB	Maintenance and reporting of S–4 (well status) data including notification of changes for the operators. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Claims Control and Analysis	Labour	To collect data on claims filed by complainants under the jurisdiction of the Individual's Rights Protection Act against respondents (employers, landlords, etc.) and the reporting of such claims on a current and historical basis to aid the Commission in its day–to–day operations and long term planning. **CONTACT:** J. Stocco, Systems Branch 427–9048
	Client Monitoring System	AADAC	Monitors active treatment and out–patient AADAC clients and clients of AADAC funded agencies. **CONTACT:** Art Dyer, Manager 427–4275 Program Analysis and Information
	Climatic Data Processing System	Energy/Forestry	To capture, maintain, analyze, report and archive climate data. Provides statistics on climate for use in establishing agro–climatic ratings for land parcels. **CONTACT:** Marilyn Raynor 427–7222
	Coal Exploration Statistics	ERCB	Maintenance and reporting of coal exploration activity. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Commercial Fish	Energy/Forestry	A microcomputer system which monitors the sale, trade and ownership of commercial fishing licences. **CONTACT:** N/A

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Common Information System	Advanced Education	To capture student enrollment data and program information for Private Colleges and Technical Institutes. Provides tape input to Statistics Canada on an annual basis. **COMMERCIALIZATION STATUS:** Excluded **CONTACT:** Dan Goodier 427-7147
	Community Education Services Information System (CESIS)	AADAC	The system monitors community education project activities conducted by AADAC. **CONTACT:** Art Dyer, Manager 427-4275 Program Analysis and Information
	Community Profiles	ED&T	To maintain information on Alberta communities such as local resources, population and government contacts. **CONTACT:** Mel Wong 427-2005
	Company Information System (BOSS)	ED&T	CIS provides company information to private industry and government. It is designed to promote production and trade. (Microcomputer) **CONTACT:** Richard Snyder 427-0675
	Compulsory Registration System	Energy/Forestry	Mainframe system which monitors the registration of certain species harvested. **CONTACT:** S. Shurman 422-9534
	Consumer Credit System	Consumer & Corp Affairs	Monitor program statistics. Has a link to the OPD/DAB system to collect financial statistics. Victor 9000 custom built (MSBASIC). Used by Consumer Credit. **CONTACT:** Jack Lord, Consumer Credit
	Consumer Education Tracking System	Consumer & Corp Affairs	System is used to record education activities performed by staff for various agencies. The system can generate various reports and statistics. WordPerfect address files can also be generated for mail merging or labels. A Bring Forward subsystem is also included. A clipper system developed for IBM microcomputers and compatibles. **CONTACT:** Dale Hrdlicka
	Contact Sheet System	Consumer & Corp Affairs	The system collects data on the number of clients that contact the department. The system produces reports on the number of contacts by geographical location over a period of time, the type of contacts and the nature of the contact. **CONTACT:** Dale Hrdlicka

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Core Research Centre System	ERCB	Automated management of materials, facilities and services for the ERCB Core Research Centre. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Cost Control Historical Database	PWSS	Designed to collect, manipulate and report on key elements of projects developed by PWSS. To include all available project history. **CONTACT:** Management Services Branch, Systems Section 422-2222
	Crop Damage Control Compensation (CDC)	Energy/Forestry	Produces reports on amounts of damage to crops by wildlife and compensation awarded by AHCIC. **CONTACT:** K. Lungle 422-9536
	Cruise Compilation System (CRUZCOMP)	Energy/Forestry	Compiles detail cruise information from sample plots within the forests and provides volume summaries by timber type for selected species. Provides information for Timber dues appraisal. **CONTACT:** D. Morgan 427-8401
	Data Dissemination System	ERCB	Provides a flexible and comprehensive data retrieval facility of all ERCB data through On-line General Query and magnetic tapes/microfilm. Confidential data is restricted. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Data Entry Statistics Program	Transportation/Utilities	It records data entry operator statistics on the Mohawk 2400 for each operator. It generates summary reports which can be used for the evaluation of operators. **CONTACT:** Don McTavish 427-8690
	DFS/CFS Statistical Sampling	Treasury	Select payment transactions for auditing, using online updating of selection criteria. Place payments on hold until audit is complete. Produce reports identifying selected documents, volumes, etc. Interfaces with DFS/CFS. **CONTACT:** F. Scarfone 427-0682

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Economics and Statistics	Health	A system of collecting, sorting, and reporting statistics on paid claims. Interfaces with Claims Processing System. **CONTACT:** Brent Sorken 427-1466
	Electrical Certification	Labour	A micro based system to capture, update and maintain both Journeyman and Master Electricians' certification status. Examination information is maintained on the Journeyman Electrician system. When a Journeyman advances to a Master Electrician, the information is transferred to the Master system. Routine correspondence, reports and updates occur on a regular basis. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Employment Standards Claims Processsing	Labour	To collect data on claims employees initiate, based on the Employee Standards Act, against their employers and the reporting of their claims on a current and historical basis to aid the Branch in its day-to-day operations and long term planning. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Environment Info. System	ERCB	Maintenance and reporting of spills, gas releases, noise, odour and smoke occurances. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Family Relations Systems	Family & Social Services	This is a microcomputer system that consolidates statistical information from District Offices on cases that are classified as family, custody or maintenance situations. **CONTACT:** Ellen Pedersen 441-6711
	Feed Testing System	Agriculture	Provide feed test reports to Alberta Farmers. **CONTACT:** Keith Toogood 427-2101
	Fire Fighters Payroll System	Energy/Forestry	A micro based system used to monitor all time certificates for fire fighters and produce T-4's at the end of the year. **CONTACT:** Marilyn Emmerson 427-3605
	Fire Operations	Energy/Forestry	To daily record and monitor the status of forest fires within the province. This system is used to assist in fire control management. (Micro) **CONTACT:** Keith Peters 427-6810

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Fire Report System	Labour	A batch system for gathering, updating and analysis of fire loss data within the Province of Alberta. CONTACT: J. Stocco, Systems Branch 427-9048
	Fire Statistical Analysis	Energy/Forestry	SPSS program providing statistical analysis on forest fire records from 1961. CONTACT: Keith Peters 427-6810
	Fire Stats	Energy/Forestry	A microcomputer system which stores data from forest fires including acres burned and fire value. CONTACT: Daryl Price 427-8401
	Fire System	Energy/Forestry	A record of forest fire data from 1961. Contains items such as causes, suppression costs, area burned, equipment used, etc. Interfaces with Fire Statistical Analysis. CONTACT: Keith Peters 427-6810
	Fluid Analysis Index	ERCB	Maintenance and reporting of fluid analysis for fluids recovered during drill stem tests. COMMERCIALIZATION STATUS: Proprietary CONTACT: G. Stagg, Information Services 297-6506
	Forage Inventory System Phase I	Energy/Forestry	Provides statistical analysis on forage data. The first phase is being used to determine the feasibility of developing a more complex system. CONTACT: Kathy Bennett 427-0708
	Free-to-grow Analysis (FTG)	Energy/Forestry	This is a micro based system. Analysis of young forest stands growth patterns by areas to formulate reforestation growth standards. CONTACT: Lindsay Kerkhoff 427-8474
	Fur Trapping System	Energy/Forestry	Provides statistical analysis and reports on trapline harvests. CONTACT: C. Trowsdale 427-6729
	Gas Energy Data System	ERCB	Integrated geological and reserves gas data. COMMERCIALIZATION STATUS: Proprietary CONTACT: G. Stagg, Information Services 297-6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Gas Gathering/Gas Plants	ERCB	Maintenance and reporting of gas data (S-20, S-21). **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Gas Reserves System	ERCB	Maintenance and reporting of gas reserves data. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Historical Production/Injection System	ERCB	Create a VSAM file for use by technical applications in Oil department. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Human Rights Commission Intake	Labour	This microcomputer systems will allow HRC to capture and search information related to human rights intakes. Many HRC intakes later become formal complaints. The system also provides for analysis of the information. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Impact	AADAC	This system collects demographic and assessment data regarding participants who have attended IMPACT (a course for repeat impaired driving offenders, conducted by AADAC). **CONTACT:** Art Dyer, Manager 427-4275 Program Analysis and Information
	Income Security Statistical System	Family & Social Services	This system produces a large volume of different reports for administrative, monitoring and research purposes using Income Support data. **CONTACT:** Peter Trommelen 441-6711
	Insider Trading	Consumer & Corp Affairs	DBase III system designed to capture Insider Trading and Form 20 data and upload the captured data to the mainframe for inclusion in the weekly Insider Trading Report. **CONTACT:** Laurie Murray
	Institutional Reporting Information System (IRIS)	Health	Collection and editing of institutional, statistical and financial data for acute care and auxiliary institutions. **CONTACT:** Terry Oakes 422-9449

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Integrated Bargaining Information	Labour	An integrated database that contains information from the mediation process, filed collective agreements, wage settlement information, departmental surveys, parties involved, progress towards negotiations of new agreements, information on work stoppages, high profile strikes and lockouts and other jurisdictions. **CONTACT:** G. Cradock, Systems Branch 427-9048
	Integrated Geological Data System	ERCB	Integrated computer assisted system for all geological reservoir evaluations. The system processes depth and pay data for consolidated and non-consolidated oil sands and conventional oil and gas reserves. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Investment Matching	ED&T	To match investors with Alberta companies seeking funds. (Microcomputer) **CONTACT:** Bob McMillan 422-5025
	Invoice Frequency System (IFS)	Recreation and Parks	Provides upper management with statistics that show the processing time on invoices sent to various divisions. **CONTACT:** Director, Financial Services 427-2901
	Jurisdiction Profiles	Education	Provide statistical data on school boards (jurisdictions), including enrolments, financial data, student achievement, teacher statistics, etc. Interfaces with all components of the Education database. **CONTACT:** Sam Radke 427-5745
	Juvenile Stand Survey (JSS)	Energy/Forestry	This is a micro based system. Analysis of young forest stands composition growth and silvacultural performance to ensure future annual allowable cuts will be met and to identify those areas requiring corrective treatments. **CONTACT:** Lindsay Kerkhoff 427-8474
	Labour Relations Board Index	Labour	A batch system for gathering and reporting of certification and written decisions of the Labour Relations Board. Output reports are produced by Parties, Board File no., Section of Act and Subject area. **CONTACT:** J. Stocco, Systems Branch 427-9048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Lease Inspection System	ERCB	Records containing the results of lease inspections and programs to generate letters to lease operators as well as compilation of statistical reports. CONTACT: G. Stagg, Information Services 297-6506
	Licence Suspension Inquiry System	Energy/Forestry	This system tracks all persons charged with Fish and Wildlife offences and maintains the licence suspension dates which result from convictions. CONTACT: Carol Powell 427-8205
	Local Business Information System	ED&T	To develop a database on businesses by community in Alberta in cooperation with Statistics Canada. (Microcomputer) CONTACT: Roger Jackson 427-5267
	Market Demand/Allowables	ERCB	Maintenance and reporting for proration to market demand. COMMERCIALIZATION STATUS: Proprietary CONTACT: G. Stagg, Information Services 297-6506
	Marketing Data Base (AGDATA)	Agriculture	On-line APL conversational database, statistical analysis and graphics system for commodity price and volume data. CONTACT: Pat Olson 427-2101
	Microcruz	Energy/Forestry	To enable field offices to do analyses of tree mensuration information collected from a cruise. Analyses done are compilations, timber yield estimates and log breakdown tables. (Micro) CONTACT: Dave Morgan 427-8401
	Milk Grade and Price Program	Agriculture	Basic Micro application to record and track quality violations by milk producers. Letters are generated to inform producers of violations and penalties to be applied. CONTACT: R. Ally 427-2101
	Milk Market Sharing	Agriculture	To administer the Alberta Plan for Milk Market Sharing. Essentially the system maintains each producer's registration, his quota and a record of his shipments in the current year to date. Also, maintains a record of subsidies issued by CDC. CONTACT: Lloyd Johnston 429-2735

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Miscellaneous Census and Questionnaire Programs	Municipal Affairs	A collection of standalone programs which perform various operations on census and questionnaire data. Includes a questionnaire edit program, an edit correction program, and a number of statistical programs. **CONTACT:** Lloyd Livingstone 427–4868
	Morbidity/Annual Returns Reporting System	Health	This system extracts and summarizes information from the Morbidity system and the Hospital Annual Returns System. **CONTACT:** Terry Oakes 422–9449
	Occupational Health and Safety Statistics (OHSS)	Recreation and Parks	Produces statistics on injuries to employees of the Department. **CONTACT:** Co–ordinator, Occupational Health and Safety 427–2935
	Officer Daily Work Analysis	Energy/Forestry	Provides monthly reports for Fish & Wildlife officers listing type of duty, time on duty, distance travelled, contacts; summary on hours, distance and contacts by activity. **CONTACT:** R. Adams 427–8205
	Oil and Gas Agreement Sales	Energy/Forestry	Microcomputer system developed to support Oil and Gas Agreement Sales administration. System provides pre–sale and post–sale information with statistics and reports. **CONTACT:** Eugene Saldanha 427–7749
	Oil Proration Forecasting	ERCB	Model for oil proration **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506
	Origin Destination Survey System	Transportation/Utilities	A collection of programs to manipulate and analyze the data collection in Origin – Destination Surveys. The data includes information on the origin and destination of vehicle trips, trip purpose, intermediate stops, vehicle type, number of passengers, license, etc. **CONTACT:** Don McTavish 427–8690
	Park User Statistics Collection System	Recreation and Parks	The system provides the capability of collecting, analyzing and reporting on camping, day–use and group–use statistics for Alberta's provincial parks and recreation areas. **CONTACT:** Management Support Branch 427–6791

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Pension Plan Files	Labour	The system will provide Branch administration with the necessary data to perform on-going program activity by providing a comprehensive statistical data base for manipulation, yielding required information to support Branch and public requirements. **CONTACT:** J. Stocco, Systems Branch 427-9048
	Permanent Sample Plot (PSP)	Energy/Forestry	To store and maintain information about PSP's. The information pertains to all aspects of tree growth within the plots. The information is used as a means of determining and predicting growth rates, canopy closure, age and yield estimates for various species. **CONTACT:** Dave Morgan 427-8401
	Permanent Sample Plot Catalog	Energy/Forestry	To provide a means to organize, access and update the header information pertaining to permanent sample plots. This is an independent micro system which enables the PSP header information to be dealt with separately from the PSP information. **CONTACT:** Dave Morgan 427-8401
	Pipeline Info. System	ERCB	Maintenance and reporting of pipelines in the Province. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Planning Ahead Information System	AADAC	The system maintains information about clients who have attended AADAC's Impaired Drivers Course. (Planning Ahead) **CONTACT:** Art Dyer, Manager 427-4275 Program Analysis and Information
	Planning Data Base System	Energy/Forestry	Provides information for Public Involvement Program, research/bibliographic data and mailing lists. **CONTACT:** Craig Taylor 427-7413
	Plumbing and Gas Certification	Labour	A micro based system to capture, update and maintain Gas Fitters and Plumbers certification status. This information is maintained and necessary for providing branch permit approvals as requested by the public. Routine correspondence and updates occur on a regular basis. **CONTACT:** J. Stocco, Systems Branch 427-9048

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Production/Injection System	ERCB	Maintains production injection and disposition records for oil and gas wells in Alberta. COMMERCIALIZATION STATUS: Proprietary CONTACT: G. Stagg, Information Services 297-6506
	Professional Services Information System	Health	Several small information systems that summarize and report statistics on practitioners for external users (the AMA and the EMSAF committee). CONTACT: Brent Sorken 427-1466
	Project Management	Health	Recording/reporting service requests. CONTACT: Terry Oakes 422-9449
	Rail Cost Analysis	ED&T	To provide a database for analyzing rail costs including the build up of rail unit costs and for the estimations in the annual grain rate update. CONTACT: S. Jahnsen 427-0741
	Rail Origin/Destination DB	ED&T	Contains rail traffic orginating in and destined to Alta since 1979. (CN/CP & Transportation Services) CONTACT: S. Jahnsen 427-0741
	Real Estate Land Values	Agriculture	Yearly analysis of rural land sales. CONTACT: Keith Toogood 427-2101
	Recreation Grants Processing System (RGPS)	Recreation and Parks	The system assists Recreation Development Division in processing recreation grant applications. The online update and browse facilities allow the user to keep the status of an application current. Batch reports can also be produced if needed. Once the application has been processed, the user has the facility to move the information to the Recreation Grants Information System. CONTACT: Director, Community Recreation and Sport Branch 427-2001
	Recreation User Statistics	Energy/Forestry	Mainframe system stores recreation user statistics gathered by APS field staff. Data are compiled and analyzed for budget justification, long range planning and site planning. CONTACT: Norm Rodseth 427-3582

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Reference Rate/Minimum Level System	ERCB	Maintenance and reporting of basic well rates and prorations. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Regeneration Performance Monitoring	Energy/Forestry	To quantitatively evaluate and compare the performance and survival rates in planted reforestation stock by linking establishment success with treatment. **CONTACT:** Lindsay Kerkoff 427-8474
	Rental Invest. Inc.	Municipal Affairs	Control mechanism and historical data. (IBM PC/XT) **CONTACT:** Lloyd Livingstone 427-4868
	Reserves Administration System	ERCB	Maintenance of historical and current field/pool information including field boundary maintenance and Oil/Gas Department approval of geological pay data assigned to a pool by Geology Department. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Rework Information System	ERCB	Facility to add any information for reworked wells usually maintained as a single unit. The data is then used by the TOURS system. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Rig Inspection System	ERCB	Records containing the results of drilling and service rig inspections and programs to generate letters to rig operators and well licensees, as well as compilation of statistical reports. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	River Forecasting Weather Radar (RFWR)	Environment	Automatic data collection from Alberta weather radar to provide precipitation data for hydrological analysis associated with flood forecasting. **CONTACT:** Bill Kuhnke 427-6278

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Rural Highway Transportation Planning System	Transportation/Utilities	This system is used for planning highway programs. The system inventories the physica characteristics and use of an existing road system, records data on the type and volume o traffic using the highway, and records information pertaining to the condition of each highway section. The stored data is then used to determine what action is necessary to maintain th highway at a serviceable level, considering the goals and financial capability of th government. **CONTACT:** Don McTavish 427-8690
	Sawmill Recovery Study	Energy/Forestry	A study of the Paul Cull System and possible indicators to establish a similar system fo analysis of cull, appraisals, average recovery factors, and effects of factors influencin recovery. **CONTACT:** D. Quinnell 427-3558
	Sawmill Time Studies	Energy/Forestry	A study of lumber recovery from individual trees or logs for milling. Analyzes the influenc of factors affecting recovery. **CONTACT:** D. Quinnell 427-3558
	School Bus Crash Information System	Transportation/Utilities	This system is used by Transportation Safety Branch to keep track of school bus accident which occur in Alberta within a particular school year. **CONTACT:** Don McTavish 427-8690
	SE Alberta Reserves and Deliverability	ERCB	Analysis, plots and well density for SE Alberta Reserves and deliverability projects. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506
	Security Service Management Information System	Recreation and Parks	The system summarizes and reports on incidents involving violations of provincial and federa legislation within Alberta's provincial parks and recreation areas. **CONTACT:** Management Support Branch, Visitor Services Branch 427-6791
	Segregation Surveillance System	ERCB	Surveillance system for well data. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297-6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Seismic Data Monitoring/Analysis (SMDP)	Environment	Turtle Mountain/Oldman River/Cold Lake seismic system. **CONTACT:** D.K. Bingham 427–6289
	Special Licence Draw	Energy/Forestry	A batch system which records all the applications, performs the 'random' draw and generates all the supporting reports, summaries and licences or authorizations. **CONTACT:** C. Trowsdale 427–6729
	Speed Study Analysis	Transportation/Utilities	This is a batch system used to generate reports on road speeds of vehicles. It allows the user to generate printed reports for each speed study. **CONTACT:** Don McTavish 427–8690
	Spot Speed Passing System	Transportation/Utilities	This program is used to provide speed/frequency information for a variety of vehicles classes travelling on provincial highways, field personnel collect raw speed data using radar. The information collected is used to determine the road use characteristics and its safety aspects. **CONTACT:** Don McTavish 427–8690
	Stand Dynamics	Energy/Forestry	To store and maintain information collected about permanent sample plots. These plots are located in newly harvested lands and do not exceed 20 years of age. The information collected pertains to all aspects of tree growth. **CONTACT:** Brian Maier 422–1038
	Statistical/Data Collection	AADAC	Based on dBase IV, this system has been programmed to collect data on printing projects and assist with project management. In addition, various specialized reports can be generated. **CONTACT:** Grace Whitehouse 427–7319
	Subdivision Application Handler	Energy/Forestry	A micro based system used to keep track of subdivision applications. This application produces various tables, graphs and reports. It also keeps track of land authorities. **CONTACT:** D. Ruggieri 427–5209
	Sulphur Disposition System	ERCB	Maintenance and reporting of sulphur disposition for Sour Gas Plants. **COMMERCIALIZATION STATUS:** Proprietary **CONTACT:** G. Stagg, Information Services 297–6506

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Superintendent of Insurance Reporting System	Consumer & Corp Affairs	Clipper system which collects statistical information on Insurance Companies of Alberta and produces the Superintendent of Insurance Annual Report. CONTACT: Arthur Hagen, Insurance Branch
	Surface Rights Board Hearing System	Agriculture	Knowledgeman application that holds information on hearings for statistical purposes. CONTACT: Rob Pungor 427-2101
	Surface Rights Board Decision System	Agriculture	Knowledgeman application that holds information pertaining to decisions written in the past that may need to be reviewed at the present or in the future. CONTACT: Rob Pungor 427-2101
	Survival Plot (SVP)	Energy/Forestry	A micro based system. Analyze and monitor regenerated forest stands to determine dynamics of composition, growth and mortality in a variety of reforested areas. CONTACT: Lindsay Kerkhoff 427-8474
	Taxation Statistics System (TXST)	Treasury	To generate statistical reports for senior management and the minister based on the Corporate Income Tax System database. CONTACT: J. Parton 427-9416
	Timber Management Planning System (TIMPLAN)	Energy/Forestry	Analysis of phase 3 inventory data for long term timber supply. Interfaces with AFORISM. CONTACT: E. Wrangler 427-8380
	Timber Records Enumerations & Evaluations (TREES)	Energy/Forestry	To support the Forest Act and the Timber Management Reg. in the area of Timber Royalty Assessment, analysis, calculation of scaling data, calculation of dues & changes, and recording of timber products. Interfaces with MARS. CONTACT: V. Danes 427-3558
	TPLOT	Energy/Forestry	A family of SPSS files using data from temporary sample plots for analysis of stand structures and volumes. Interfaces with CRUZCOMP. CONTACT: D. Morgan 427-8401

SYSTEMS INVENTORY

SYSTEM SUBJECT	SYSTEM TITLE	DEPARTMENT	SYSTEM PURPOSE
Stats/Data Collection	Traffic Counter System	Transportation/Utilities	A collection of programs to manipulate and analyze traffic volumes on primary highways in Alberta. The information obtained from this system is used for highway planning purposes. There is much demand for traffic information from other government departments and from the private sector. CONTACT: Don McTavish 427-8690
	Traffic Turning Movement System	Transportation/Utilities	This system summarizes manual turning movement counts taken at intersections over various periods of time on provincial highways. It is used for highway planning. CONTACT: Don McTavish 427-8690
	Tree Measurement Analysis	Energy/Forestry	A batch inventory of measurements from sectioned sample trees for studies of shape, volume, cull, etc. CONTACT: D. Morgan 427-8401
	Veterinary Information System	Agriculture	Veterinary reporting system for retrieval and management reports. CONTACT: R. Pungor 427-2101
	Vital Statistics	Health	This system records data on births, deaths and marriages provided by a variety of sources in the province and provides statistical reports for various agencies. CONTACT: Terry Oakes 422-9449
	Water Quality Remote System (WQRS)	Environment	Capture water quality data at the remote stations. CONTACT: Martin Soetaert 427-5893
	Watershed	Energy/Forestry	Store streamflow and water quality data regarding effects of land use on watershed. Storage and analysis. (Micro) CONTACT: Glen Bergstrom 427-3582
	Weather and Storm Statistical Analysis	Energy/Forestry	Analysis of weather and storm data for forest protection planning, through a series of SPSS programs. Interfaces with Weather Reporting System. CONTACT: Ben Janz 427-6810

PUBLIC WORKS, SUPPLY AND SERVICES COMMON SYSTEMS

This section identifies common systems which are administered by Systems Management and Co–ordination Branch and which are available at a charge. The charges for use of these systems are listed in the Revolving Fund Rates and Schedules booklet which is available from:

Financial Planning Branch
Finance and Administration
Public Works, Supply and Services
11th Floor, College Plaza
8215 – 112 Street
Edmonton, Alberta
T6G 5A9
Phone: 427–3386

For more detailed information on any of these systems contact:

Brian McDonnell, Manager
Management Systems
Systems Management and Coordination Branch
Public Works, Supply and Services
2nd Floor, 6950 – 113 Street
Edmonton, Alberta
T6H 5V7

Phone: 427–7622

PUBLIC WORKS, SUPPLY AND SERVICES COMMON SYSTEMS

Management Systems Budget Preparation (MSBP)

MSBP allows departments to record their budget data for submission to Treasury. Line management access with elaborate security and remote printing are available. The system has interfaces to and from DFS/CFS and with Payroll and mirrors the general ledger structures. Extensive reporting with online data entry and enquiry are provided. The FTE data (Manpower) is interfaced to the MUMS system in Treasury.

Management Systems Financial Reporting (MSFR)

MSFR uses interface data from DFS/CFS consisting of vendors, detailed General Ledger transactions, General Ledger balances by period, Centres and Accounts, to produce a wide variety of financial management reports for government departments. Electronic interface files of MSFR data can be provided for use with departmental in-house applications.

Management Systems Commitment System (MSCM)

MSCM provides departments with the ability to record and maintain encumbrances, while relating them to projects. Encumbered invoices are used to update the project encumbrance data as well as optionally being interfaced as direct payments to DFS/CFS. Outstanding encumbrances are reported on the MSFR4021 report via an interface file.

Personnel Information Access System (PIAS)

The PIAS system permits users to access salary and wage personnel information that is maintained on the central personnel database. Position and employee reports may be requested at pre-defined frequencies from either a standard report library or from a library of ad hoc reports developed by the end user. The system also provides a facility for downloading Extract Files to microcomputers for additional reporting and analysis purposes.

Government Services Mailing Labels System (GSML)

GSML provides an automated means for maintaining an electronic name and address file to produce various types of mailing labels and listings.

Automated Records Information System (ARIS)

ARIS is an automated records information management tool. The software enables records offices to manage the creation, charge-out and final disposition of both subject and case files. Standalone microcomputer and LAN versions of the software are available to handle either "full" or "mini" case files as well as the subject files.
